Adjutant 20/20 Release Notes

Version 2409.A

Address Book

ECR 43812 **Sold To Security**

A new security token option has been developed to prevent changes to the Price Code on the Sold To attribute screen. The 'S1' value for the 'SOLDTO' Security Token can be set up as 'Disable Price Code'. If checked at the user security level, it will prevent that user from editing the Price Code field.

Approval Management

ECR 44111 **Pending Approval Screen**

The AP Invoice Payment Priority code has been added to the Pending Approvals grid as an available column for reviewing and sorting by the payment priority code linked to an AP Invoice record.

Item Control (Inventory)

ECR 43615 **Prompt 4 (Put Away/Move)**

An Adjutant 20/20 VTERM version of Prompt 4 (Put Away/Move) has been developed for use with the new Virtual Terminal screen.

Project Management

ECR 43868 **Project Master**

The Project Master record will now show address details associated with the Ship To location. The Ship To information has moved to the to right area of the Project Master tab and now shows Address1, Address2, City, State, Zip, and County for the selected Ship To.

Adjutant 20/20 Release Notes
Version 2409.A

Quoting

ECR 43690   **Quote Master**

This update adds the following additional columns to the Quote Import accessed from the Customer Quote screen. For all of the new columns options below, except for Production Notes, an entry in the column will override the default logic/value. Leaving the columns blank will use the same default logic that would be used as if you were adding the item manually to an existing Quote record.
1. Sell Price
2. Description
3. Ship Warehouse
4. Plant
5. Production Notes

Rule Maintenance**   **RFQMAP1**

Shipping Events (Logistics)

ECR 43182   **Shipping Events**

A new CID Setup Option is available for customers using the SELINK logic. The new SELINKALLOC option, If enabled, will prevent auto linking lot controlled items to the SEs.   This option will also split the lines up on the linking screen by allocated lot, and allow them to be linked by lot. Logic has been added to Prompt 79 to limit loading to linked lots. Add lotlink expression to SE Preload report. Update the SE shipping process to not delete the SOALLOCATION records until the SO is closed.

Setup Options**   **SELINKALLOC**

System Manager

ECR 43753   **Email logic**

Add logic to support using the Google email API for sending email if customer is using gmail (google app) email accounts.

Version 2409.A

** Additional information for the Setup Options, Rules, and Programs areas

Setup Options	Setup Options are system-wide controls that must be enabled/disabled in CID Maintenance. Some Setup Options will not display until the related application has been accessed. Contact your consultant for assistance with enablling/disabling Setup Options.
Rule Maintenance	Rules are added or updated in the Rule Maintenance screen. If you are not familiar with adding or updating Rule Maintenance headers or details, contact your consultant for assistance.
Programs Affected	Programs are system-level routines that must be updated manually by ABIS personnel. You must contact your consultant to coordinate updating the associated Program before taking advantage of the enhancement. Program updates may require system downtime, or may be required to occur outside of business hours.

Total Number of Changes: 7
