

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23775	Enhancement	810 Generator screen	Add new option to process all EDI customers	Change 810 screen to add option to generate all customer 810s in single pass.;
23738	Enhancement	AMS	Add setup option to move data from bundlecode field to bundlecode2 field for processing.	Add new setup option (AMSBUNDLE1). If set, move data from bundlecode to bundlecode2 in amsproduce table. (used to auto bundle ams created items);
23743	Enhancement	AMS Bundle Upload	Add logic to put shipvia into amsbundle.trucknum field during AMS upload	Fill out amsbundle.trucknum with SO shipvia.;
23732	Enhancement	Report Sets Consolidated Billing Form	Add Billmast.duedate and billmast.sodate to the consolidated billing form.	Add billmast.sodate and billmast.duedate to c_master cursor.
23762	Enhancement	EDI EDI Info Change	Need to change EDI information sent to one specific customer (Custno TITANHO). Currently sending a small amount of BILLTO data and complete SOLDTO Data. For this customer, do not send any SOLDTO data, but rather the complete BILLTO data. Specifically, Bill to Name, Address, City, Province, PostalCode (see attached image).	Add new logic to westfrom EDI to make SO record = billto data for TITANHO billto.
23722	Enhancement	Procurement GenPO & QuickBuy	When using GenPo to send line items to QuickBuy, there needs to be logic to determine if a SO line item has been manually linked to a PO to prevent that line from being sent to QuickBuy and causing duplicate purchasing.	Add check for PO linked to SO directly from PO screen. If found, do not allow PO generation for that line.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23769	Enhancement	Report Sets Gross Margin Reports	Add SO type filter to Gross Margin reports. GMARGININV, GMARGINSO, GMARGINCINV	Add SO type filter to Gross Margin reports. GMARGININV, GMARGINSO, GMARGINCINV
23750	Enhancement	Item Control (Inventory) Inputs/outputs in mod proc	For inventory share process, add a link between the inputs and outputs and save that link with the ouputs during modification processing.	Push original pnumbers into asn field in itemact records. Use this field to match inputs to outputs during xa upload file processing.
23737	Enhancement	Task Management Lot/Block/Serial	Add lot, block, serial in task grid report cursor	Add lot, block and section to task grid. (lot, block and lsection in cursor)
23776	Enhancement	Production New PWO Label Screen	Add program that will print Project ID and a PL-number (from any incomplete line item) based on a user-input PWO number. The barcode is for the PL number. The program should ask for a quantity of labels. The label is 2x1 and will print on a Zebra (not a sheet label).	Create screen and label per request. Label template is lpwoopen.txt. Template will have to adjust to fit on 2x1 label.
23764	Enhancement	PO Receipt	Create new POSKIPLABELSCOIL flag to skip printing coil labels during PO receipt	Add new POSKIPLABELSCOIL setup option, if set skip printing labels during receipt of coils;
23772	Enhancement	Purchase Orders PO Screen	Change default whse logic  On new PO, apply in this order  Vendor Default whse (sold From Screen) User Default whse (on User screen) System Defa whse (def in rule)  Do not change whse on edit based on any of these rules	Change default whse logic to Vendor whse User whse System defa whse. Do not update whse on edit unless changed by user.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23745	Enhancement	Post Load Report	Change logic to fill out shiptoid at carton level for first level cartons based on SO of items in carton.	Change logic to fills out shiptoid on first level cartons.;
23768	Enhancement	Production Production Scheduling Display	Add edit in grid functionality to the Production Scheduling (SCHEDMASG2) screen so users can enter PWO Comments directly in the grid.	Change PWOCOMment to be editable in grid. Write changes back to PWO on exit of field
23760	Enhancement	Production Production completed report	Update Production Completed (PWOLIST) report with department filter.	Add Single Dept filter to Report.
23744	Enhancement	Accounting Connector Prompt 74	<p>Add setup option to modify Prompt 74. Auto bundle/carton print feature: allow user to scan a line in 74, then they would be prompted to "Print XXX labels for XXX each's" on the line item, and it would print out the detail label and the outer carton label for this line.</p> <p>When user scans the SO Line, it would ask how many cartons, how many in each carton, then make carton labels, with that many already scanned into each carton</p> <p>New Logic would: Create and print the outer carton Load the carton with specified pieces Create and print the detail label</p> <p>After the load prompt, user will receive a prompt that asks "Print outer labels?-1 Print Detail labels?-2 Print both?-3" which will allow the user to decide if they need to print both the outer and detail carton label.</p>	<p>Create new process in 74 to allow auto create and load of cartons. Will not work with serial/lot items.</p> <p>Scan SO Enter * Scan SO Line Enter Number of Cartons Enter Number Per carton Enter Number of Items to Load Enter type of label (both, carton, bundle) Fill out prompts for first cart (name, type, location) System then makes all cartons, packs items into cartons, prints bundle labels ;</p>
23747	Enhancement	Warehouse Management System Prompt 79	Change P# logic to locate correct SO line for checking qty to load.	Change logic to process P# scan during Prompt 79 correctly;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23757	Enhancement	Warehouse Managment System Prompt 79 (clabel)	Remove the company name from the carton label generated through prompt 79.	Add logic to check for single customer and single so on linked SE. Suppress customer and/or SO if multiple linked to SE;
23758	Enhancement	Warehouse Managment System Prompt 79 Stop	Created setup option to halt users from loading 2 items from different sales orders into lower level cartons.	Add new setup option (79LOCKSO) if enabled, the carton is locked to SO of the first item added to it (unable to add items from different SO) Only checked at the SO# line/P# level. Loading cartons into cartons is not changed.;
23763	Enhancement	Accounting Connector RFQ Non Stock Desc	Move logic from 23723 to RFQ	Verified that NS descriptions can be edited during adding of item.;
23770	Enhancement	RFQ Screen	Socdesc reset to show keynos instead of list answers on edit of other lines	Change logic to ensure that socdesc has answers to list type questions not keynos when other lines are edited.;
23771	Enhancement	RFQ Screen	Change Config Answer Extra Note logic to process all answers. Current logic stops processing item after first answer is found that has note.	Change logic to continue to check other answers for custom notes, append notes to note in order of questions.;
23773	Enhancement	SE Preload Report	Change logic to use openqty instead of qtyord when starting processing.	Change printse to use qtyopen instead of qtyord when starting processing. Set qtyord = qtyopen at end of processing so that either can be used on reports.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23741	Enhancement	SUR-Logic	Add check of shipto for log6 = 'y' before adding FuelSurchages (looks for FUEL in item code)	Add logic to check shipvia (log6) for Add FuelSurchage Flag. If found, and billto has SUR-FUEL flag, then add surcharge. If log6 not set, then do not add surcharge. Logic looks for FUEL in itemcode to flag surcharge as fuel surcharge.;
23748	Enhancement	Task Management Schedule Conflict Message	Add a setup option that disables the schedule conflict message which occurs when you schedule a resource for a time that overlaps an existing task.	Change task screen to use new ALLOWOVERLAP setup option. If enabled, do not show message on conflict, just schedule as entered.
23767	Enhancement	Selecting BarCode Printers	On CoilFind, the printer number does not update. When printing tags, the prompt has the wrong printer name. (the tags print to the selected printer)  Make the font smaller, field larger to show full printer name (ftp printers have long names) on both findcoil and displaycoil	Change findcoil to update printer number on change of printer. Change prompt to show correct printer name when printing. Make printer field larger and smaller font to show full printer name  Change display coil label screen to make printer field larger and smaller font to show entire printer name.;
23755	Enhancement	Surcharge logic	Change SE Load Carton shipping logic to automatically ship 100% of the open SUR amount during the carton ship process	Change SO screen to reuse existing SUR lines when recaclulating SUR amounts (to keep shipped status)  Change SE Add ship carton logic to handle SUR lines like FRT, but don't show user box (Ship all unshipped lines, flag as shipped after first shipment so they will not ship again if SE is shipped again before invoice is generated);
23754	Enhancement	Wireless Production	Make AMSCOIL record if making coils and ams is enabled.	Change CertPWO program to make amscoil record for coils where ams.material is filled out.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23774	Enhancement	Wireless Production	Add new PRINTCOILLABEL to allow override of NOLABLESONASSEMBLY for coils during wireless production. If set, the coil labels will print even if NOLABELSONASSEMBLY is enabled.	Add new CID option (PRINTCOILLABEL), if set and SKIPLABLESONASSEMBLY set, print coil tags anyway (Wireless production);
23739	Enhancement	XA Inventory Upload	Change logic to match mod processed lines by ikey (input = output)	Change XA InvUpload logic to use ikey to match inputs and outputs to find adj lot number. No other link between inputs and outputs.;
23740	Enhancement	XA Transfer Orders	Add logic to fill out unit weight in SO lines	Add logic to fill out sotran.unitw based on itemmaster unit and qty (config len);
