

Version 1601.1425

ECR #	Type	Module/Program	Requested Change:	Change Summary:
25256	Enhancement	Accounts Payable AP Invoice Report	Add a Due Date toggle to the date range select filter which currently has Invoice Date, Post Date, and Add Date. The Due Date toggle would allow the AP Invoice Report Start and End Date range to select AP Invoice records based on due date.	Add Due Date as filter option for dates
25287	Enhancement	Accounts Payable AP 1099	AP 1099 alignment test will only print 1096 form for alignment. Should print selected 1099 type form if Final 1096 box is not checked.	Change Align test button to use correct form if 1096 button is not checked.
25264		Address Book Project # Column	Make the Project # column on the people air hammer show project number, not the keyno.	Add msn.msnnum to cursor. Change grid to show msnnum instead of keyno
25265		Address Book People Air Hammer	Allow projects to show up on the projects tab of the people air hammer for people who are listed as salesperson or account manager. Currently, only project managers see anything on the projects tab.	Change logic to include all projects where the contact is the project manager, the sales person or the account manager (enable with PEPSPALSO setup option)
25277		Custom Reports Working Form Report Cursor	Add project customer org information and project manager to the working form report cursor.	Add PMNAME to zmsn and zmsn2 cursor for project manager name. Add zsoldtoorg cursor holding Org info for task soldto customer.
25228	Enhancement	EDI From Task	Add logic to update generated sales order basecostl with item's basecost when making Sales Orders for incoming EDI POs	Add logic to update generated sales order basecostl with item's basecost when making Sales Orders for incoming EDI POs
25232	Enhancement	Item Control (Inventory) Inv Issue Screen	Change item code to take 20 characters. Update item co label to Item Code. Update Location label to Whse (Name), field is whse name filter. Add (Shipping) to title. Report is itemact.type = "S" based report (Shipped item)	Change lables, make Item Field 20 characters.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
25179	Enhancement	Order Entry Add to S2P, Print Packing List	Through a new setup option, once the process initiated from the S2P button is complete, add an additional prompt to print packing list. If setup option is enabled, make the text display "Submit to Plant" when hovering over S2P button. Also with this setup option enabled, when S2P is selected and there is nothing to produce, once the user selects ok on the "nothing to produce" notice, bring up the option to print packing list.	Add new setup option (SOAUTOPRINTPACK), if set, then change tool tip on S2P button to "Submit to Plant", also launch Print SO screen in Packing list mode after generation of PWOs.
25229	Enhancement	Order Entry Sales Order Approval Reset Logic	Always reset approvals on copy of SO (if RESETAPPR1 is enabled, they are only reset if terms or total changes)	Change logic to reset approvals on save of new copied order even if ResetAppr1 is enabled.
25223	Enhancement	Production Cutsheet Report	Change the Cut Sheet report to use the SO Req Date.	Change report to use Sales Order header Req Date.
25244	Enhancement	Production OPENPWO report	Add logic to allow a default report to be selected when a department filter is used on OPENPWO screen that will link the Dept code to the form name. Allow for both summary and detail reports. i.e. Panel department is selected in DEPT rule code is 12, in message control report name OPENPWO12 will default in.	Add setup option (OPWOLINKDEPT) to change default report name to match dept code
25245	Enhancement	Production OPENPWO report	Add gross weight GW expression to report cursor	Add unitw2 to cursor (From sotran for SO based PWO, from itemmaster for build to stock) qty*unitw2 is line wt.
25248	Enhancement	Production Lock Required Quantities	Add a setup option that when enabled, in the PWO master screen on the Assign tabs, the required quantity in the bottom grid will be locked for the usage input. This way anyone that checks this screen can	Add new PWORESETREQ setup option. If set, then reset serial/lot req to actual BOM qty in cases where bom item is only assigned to PWO once (single lot/serial)

ECR #	Type	Module/Program	Requested Change:	Change Summary:
			quickly see where the quantity assigned exceeded the required quantity.	
25271	Enhancement	Production PWO - Lock Wt SO flag	If SO line has lockwt flag set, then do not update wt from PWO input items.	Update PWO complete logic to not update SOTRAN.unitw2 if sotran.lockwt is set to 'y' (Locked during MBS import)
25230		Purchase Orders Soft Save Serial 2	Add logic to POREC that will soft save the serial fields when you click on a new line so you can enter information for each line then receive them all at once. Currently, if you click on line 1 and enter the 2 serial numbers, then click line 2, the serial 2 field has the number from the first line. When you enter the new numbers in the serial fields for line 2 and click back on line 1, the first serial field is blank and the second serial field has line 2's serial number.	Add logic to redisplay lot/serial/serial2 numbers if only 1 item is received.
25224	Enhancement	Sales Tax Automation Tax Report	Change logic that loads TaxRate names and JurID's to use the most current TaxRate record.	Change logic to pull JurID and Name from most current Tax Rate Record.
25247		System Manager Desktop Icons Popup	Add setup option to suppress the "Make all desktop icons visible?" popup.	Add cid option (IGNOREDESKICON), to supress Make all Icons Visible message if icons are off current screen resolution.
25278	Enhancement	System Manager ECR Routing	Add logic to support double testing routes for 3.5 tasks. On complete, assign first testing task to other programmer (If Amanda, then Chris, if Chris, then Amanda) Change will be the other programmer option, do with hardcode using -50 code.	Add new dynamic alert (-50), named other resource. If used, the original resource on first task in chain is used to find alternate resource (ResNo from original resource is used to find new resource)
25222	Enhancement	Tapping Zone Requirement	Add the zone field to the OCharge generator, and add the REQZONE setup option, and add the reqZONE setup check to the WOKEN and Tap entry screen.	Add TASKREQZONE logic to Tap Generator and WO Generator screens. Add Zone field and TASKREQZONE logic to Other Charge Generator screen.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
25233	Enhancement	Task Management Air Hammer Task Tab	Add project and and phase as columns to the task tab on the org air hammer.	Add project and phase as columns to both task tabs. (open and complete)
25270	Enhancement	Task Management Task Screen	Disable Add WO button when not in edit mode.	Update logic to ensure Add WO button is disabled when not in add mode (this is the only time it should be enabled)
25276	Enhancement	Task Management "?" Task Search	Add the "?" functionality to the task filter on the task grid.	Add ? logic to task filter, show list of standard tasks, build filter with task from selected one.
25183	Enhancement	Warehouse Managment System AMS Bundle Tag	Create a setup option that when enabled will print bundle tags out of Adjutant that were generated via AMS.	Add new logic to print Bundle tag for AMS cartons as they are created in Adjutant. Use AMSPRINTER rule to control which printer they print out on. AMSCTAG setup option enables printing.
