Program Change Description:

Asset Tracking

28463 A new customizable Date field has been added to the Asset Master screen.
New Asset Fields

Wiki Link: <http://www.abiscorp.com/AdjWiki/RTASSET.ashx>

28464 There is now a customizable label for the Serial 2 field on the Asset Master screen.
Serial 2 Label

Wiki Link: <http://www.abiscorp.com/AdjWiki/RTASSET.ashx>

28465 The Organization Air Hammer - Asset Tab now has two new columns for Extra Date and Serial 2.
Air Hammer Columns

Bill of Lading

28613 On the BOL Summary report (BOLLOG), update the phase variable to look at any phases associated
Phase on BOL Summary with multiple orders (or multiple phases off of one order) and display all phases.

Email Integration

28626 With this update, Standard Task fields can be added to Email Templates.
Email Templates

ECR #
Program Change Description:

Import/Export Manager

28718 The "Laser Label" checkbox option has been added to the inventory label import.
Label Import

28799 If an item has Master-Track set, then importing new item quantities will create a new P number record
Inventory Qty Import (itemtrack).

Item Control (Inventory)

28488 A setup option (IMSPEC1) has been added that will show the Paint Code and the Coat from the Coil
Add Paint Code Receipt information on the @ tab of the Item Master as well as display in the search when allocating
 coil on a sales order.

Setup Options: IMSPEC1

Wiki Link: http://abiscorp.com/AdjWiki/rule-setup.ashx?NoRedirect=1#I_9

28772 Item Description has been added as a grid column in the Completed Counts and Pending Counts tabs
Cycle Count of the Cycle Count screen. The Description column header is a clickable sort field.

The new Description column will be added as the last column in the grid by default. Click, hold, and drag the new column to the desired position in the grid.

Logistics (Shipping Events)

ECR #
Program Change Description:

Logistics (Shipping Events)

28666 A new setup option has been added that will update SO Load Date, Ship Via, and SO Line Est. Dates Setup Options: SENUPSO
Load Dates when the linked Shipping Event Load Date and Ship Via fields are edited.

Wiki Link: <http://www.abiscorp.com/AdjWiki/rule-setup.ashx>

MBMA Reporting

28448 A new MBMA Monthly Reporting tool is available for users that share monthly statistics with the Metal
MBMA Monthly Reporting Building Manufacturers Association. The new reporting tool provides all of the shipments, new orders,
square footage, and backlog data needed for MBMA Monthly reporting with the push of a button. The Rule Maintenance: ITEMATTRIB
new tool provides two reports - a one-page summary form with just the data needed for MBMA, and
a detail format that shows every sales order line item included in the reporting sections. And, it can be
auto-scheduled so it is sitting in your inbox on the first of every month.

There is some setup required to begin using the new reporting tool, and some users may need to
adjust their building order workflow to begin benefitting from this new feature. See the Wiki entry for
full details.

MBS Integration

28002 During MBS SAVE & 'Convert to Order' process for BOM sales orders, Adjutant will now pull in the
MBS Grid add avg. cost average cost for stock items. This allows costing and margins to become more accurate before
production and shipping take place. (no set up is needed for this change to take place)

ECR #
Program Change Description:

Order Entry

28617
Disclaimer Text The new SOb button on the sales order will allow user to add disclaimer text to the order note via a check box. The notes will populate based on a rule that will have the name and the full text (either by typing it directly or by linking to a .txt file). When checked on a sales order, the text will populate in the note field in numerical order. User can edit the notes after they are generated. The body of the text will print on the sales order and packing list forms. The SOBLIST rule must be set up for button to display on the Sales Order screen. Rule Maintenance:SOBLIST

Wiki Link: <http://abiscorp.com/AdjWiki/SOBLIST.ashx>

Wiki Link 2: <http://abiscorp.com/AdjWiki/RULE-SOBLIST.ashx>

28634
Sales Order Form The Project Manager initials (from the associated Resource attribute) has been added to the cursor of the Print Sales Order form.

Procurement

28857
Quick Buy Add logic to Buyout Add set up option. Process updated SOADDBUYOUT logic to skip shipped in full SO lines and SO lines that are already linked to POs Setup Options:SOADDBUYOUT

Purchase Orders

28657
AvgCost PO unreceipt now will make an average cost calculation to correct average costs on mistaken PO receipts.

ECR #
Program Change Description:

Quoting

28621 User can now allocate a specific coil onto a quote. Scanner Prompt 42 will display if a coil has been Setup Options: RFQALLOCATE
Allocate Coil on Quotes allocated on a quote.

This functionality is controlled by a new setup option (RFQALLOCATE).

Wiki Link: <http://abiscorp.com/AdjWiki/Prompt-List.ashx>

28633 SO Bullet Note function can now be used for quotes as well. New quote bullet list logic shares the Rule Maintenance:SOBLIST
Disclaimer Text SOBLIST rule. Disclaimers can be printed on the quote order and are transferred to the sales order when the quote is converted .

Wiki Link: <http://www.abiscorp.com/AdjWiki/SOBLIST.ashx>

28851 A new setup options has been added that will restrict the Lot Allocation screen to read only mode if it Setup Options: RFQALLOCREADO
RFQ Allocate Screen is called from entering a line on an RFQ NLY

Wiki Link: http://www.abiscorp.com/AdjWiki/rule-setup.ashx?#R_17

Task Management

28620 A code block is available that will remove a certain item from a sales order when there is a linked project record and a task (with the code block active) linked to the project record.

28855 A new setup option has been added that will update the task numbering logic for tasks generated Setup Options: WOGENSINGLE
Work Order Generator from the Work Order Generator to always use a new task number instead of using the same task number with different letters.

Wiki Link: http://www.abiscorp.com/AdjWiki/rule-setup.ashx?#W_22

ECR #
Program Change Description:

Time Billing

28426 A new setup option has been added that will apply overtime billing splits before applying contract Setup Options: TSINCALL
Overtime Billing Increments increments. The current logic applies the increment logic on the whole time entry, then splits it accordingly based on the regular hours and overtime hours.

Wiki Link: http://www.abiscorp.com/AdjWiki/rule-setup.ashx?#T_19

28603 The Detailed Billing Statement (PRINTBS5 version) now sorts by date within each work category. Tasks
PRINTBS5 Sort Order that just have a Month as the date (such as May) are displayed first, then individual tasks that have a date should be sorted from earliest to latest.

28682 The Detailed Billing Statement (PRINTBS5 Version) has been modified to display "Materials" as the
New Bill Subcon Verbiage description for material items and "Contractor" as the description for subcontractor material lines.

28844 The new Detailed Billing Statement will now print the Item Master description for items that have a
Custom Billing Statement blank billing description.

Time and Materials

28804 A new setup option has been created that will add columns for Resource Number and Problem Code Setup Options: EMPPAYSPEC4
Resource Pay Hours XLS to the XLS that gets exported from the Resource Pay Hours Summary report.

Program Change Description:

Work Flow Routing

28028
Custom Project Events FoxProcess will now create an event based on a rule and depending on if a specific task has been completed by x number of days since a project's contract date. The process is controlled by the PROJXEVENT rule, and generates events based on projects with linked tasks that are not complete or our missing. This means that you can create routes and alerts based on key events in the life of a project. Rule Maintenance:PROJXEVENT
