Adjutant Desktop Release Notes
Version 1810.1795

ECR # Program	Change Description	Option / Rule

Address Book

ECR # Program	Change Description	Option / Rule
31553 Organization Air Hammer	The OrderNo field from the Sales Order Header screen has been added as a column to the Sales Orders tab of the Organization Air Hammer screen.	
31560 Notes Master	A new "Quick Hide" field has been added to the Notes screen that will allow hiding notes that match the text entered. This can be useful for filtering out note entries with common text, which makes it easier to find the note you are hunting for.	

Order Entry

ECR # Program	Change Description	Option / Rule
31183 Sales Order	A new custom item attribute, POGROUP### (where ### is a unique number), can direct items to unique purchase orders when PO's are generated from a sales order or quote. The new custom item attribute(s) must be added to the Item Attributes (ITEMATTRIB) Rule Maintenance screen before using. For example, there are 20 items being generated for purchase orders, 3 of the items have the POGROUP001 attribute, 1 item has a POGROUP002 atribute, and the rest of the items do not have a custom attribute. In this case, the 3 POGROUP001 items will generate a unique PO, the 1 POGROUP002 item will generate it's own PO, and the remaining 16 items will go create their own PO.	Rule Maintenance:ITEMATTRIB

ECR # Program	Change Description	Option / Rule
31535 CC processing	This update adds the street address number and zip code to all credit card transactions sent to Heartland. This additional information allows for a better processing transaction fee for customers with Heartland integration. The information will default from the Sold To record address data if available.	Setup Options: ADJCCREQ1

Adjutant Desktop Release Notes
Version 1810.1795

ECR # Program	Change Description	Option / Rule

Order Entry

	This release also contains a new setup option (ADJCCREQ1) that will require a street address and zip code before a credit card transaction is processed in Adjutant.	Setup Options:
