Accounts Receivable

Invoice Register Report
32249

The Invoice Status field has been added to the Invoice Register Report (summary mode) and is available to export as a Raw XLS column.

Address Book

Connection Info
32254

A new "Reset" button has been added to the Connection Information screen. If clicked, the user will be able to reset the Paid status of the connection to allow processing a new payment through the Tapping screen. All historical payments will continue to show up on the Tap Journal report.

MBS/Roll Former Integration

SmartComm/Connex
31491

A setup option (SMARTUSE6) has been added that will import adjustments from SmartComm with a tcode of 6 into Adjutant. If this option is not enabled, SmartComm tcode 6 adjustments will be ignored.

Setup Options: SMARTUSE6

SmartComm/Connex
32185

The SmartComm/Connex integration logic has been enhanced to allow processing orders from multiple CIDs. Contact your Implementation Consultant if you are interested in taking advantage of the new SmartComm/Connex functionality.

Production

Program	ECR #	Change Description	Option / Rule
Production			
Bill of Material	32228	"Optional" BOM items now work with the "Scaled" option. This allows users to select configuration answers tied to scaled items and have it show on a custom BOM for that specific order.	
Project Management			
Job Cost Report	32177	Detail for unlinked AP invoices now displays on the Job Cost tab of the Project Control screen. These details can also be printed on the Job Cost report. A new setup option (MSNAPJCALL) also displays variances from linked AP invoices on the Job Cost report accessed by selecting the printer icon on the Job Cost tab of the Project Control screen.	Setup Options: MSNAPJCALL
		Wiki Link: http://www.abiscorp.com/AdjWiki/rule-setup.ashx?NoRedirect=1	
Purchase Orders			
Purchase Orders	31818	The Purchase Order screen will now display line item weight in the grid area of the Line Items and Line Item View tabs. A new TotWt field will display total weight at the bottom of the screen on the Line Items tab.	
PO Configurable Pricing	32276	Adjutant now supports vendor price rounding for configurable items. This will help maintain accurate pricing for vendors that round up their costs to the nearest incremented length. Users can order configurable length items from vendors and automatically round pricing according to the vendor contracts.
