Rules**: LIMITCASHTYPE

Heartland Integration 40517	Adjutant Heartland integration has been updated to support multiple API keys in a single CID environment. This allows setting up environments that have several different physical locations, each with their own API key that is tied to the Warehouse location ID. This functionality requires configuring a unique API Key value per Warehouse and updating the back-end programs which must be coordinated with ABIS support personnel.

Address Book

Address Book 39965	The new ENTMAKECUST rule allows the user to specify additional attributes to be added to the organization when the MAKE CUSTOMER button is used. By default the Make Customer button will add the Bill To, Sold, To and Ship To attributes. This rule allows additional attributes from the ATT_ENT rule to be added as well.

** Additional information for the Setup Options, Rules, and Programs areas

Setup Options:

Setup Options are system-wide controls that must be enabled/disabled in CID Maintenance. Some Setup Options will not display until the related application has been accessed. Contact your consultant for assistance with enabling/disabling Setup Options.

Rules:

Rules are added or updated in the Rule Maintenance screen. If you are not familiar with adding or updating Rule Maintenance headers or details, contact your consultant for assistance.

Programs:

Programs are system-level routines that must be updated manually by ABIS personnel. You must contact your consultant to coordinate updating the associated Program before taking advantage of the enhancement.

Program updates may require system downtime, or may be required to occur outside of business hours.
