

Program/Change ECR #	Change Description
-------------------------	--------------------

Document Imaging

Buyout Sheets 40982	The Document Vault logic for Buyout Sheets has been updated to support folders and email tags for Inbox processing. The DROPFOLDERS Rule Maintenance record can be updated to add a code for 'ITEMSETH' with the default Email Tag of 'ITEMSETH' as well. The Document Vault folder logic and email tag will use the buyout sheet number as the folder name and the key for the tag. To process an email attachment to the vault for Buyout Sheet number 9, you would use the tag ITEMSETH[9].
------------------------	--

Rules**: DROPFOLDERS

MBS/Roll Former Integration

AMS Type 2 Reason D Scrap 40775	The AMSINC2D setup option logic has been updated to zero out remaining coil footage to a scrap account instead of against the order on the line. This is controlled by the new AMSSCRAP2D rule.

Setup Options**: AMSINC2D

Rules**: AMSSCRAP2D

Project Management

Project Control 40572	A new security token has been developed that can be used to prevent access to the 'Production' tab in Project Control. The new security token, linked to Project Control (MSN1) as special token 16 is labelled 'NO VIEW PWO TAB'. Any user with this new token checked will be unable to access the 'Production' tab in Project Control. The tab will be greyed out and inaccessible.
--------------------------	--

Purchase Orders

Program/Change ECR #	Change Description
-------------------------	--------------------

Purchase Orders

Purchase Order 40421	
-------------------------	--

A new CID Setup Option, POCHKAPINV, has been developed that will prevent edits or receipt returns on any Purchase Order (PO) line that has an AP Invoice linked. With the option enabled, for any PO line that has been linked to an AP Invoice, users will see a message that the line has been linked to AP and can not be edited. If the linked AP Invoice is voided, users will be able to edit the line or process receipt returns through PO Receipts.

** Additional information for the Setup Options, Rules, and Programs areas

Setup Options:

Setup Options are system-wide controls that must be enabled/disabled in CID Maintenance. Some Setup Options will not display until the related application has been accessed. Contact your consultant for assistance with enabling/disabling Setup Options.

Rules:

Rules are added or updated in the Rule Maintenance screen. If you are not familiar with adding or updating Rule Maintenance headers or details, contact your consultant for assistance.

Programs:

Programs are system-level routines that must be updated manually by ABIS personnel. You must contact your consultant to coordinate updating the associated Program before taking advantage of the enhancement.

Program updates may require system downtime, or may be required to occur outside of business hours.

Total Number of Changes: 4
