MBS/Roll Former Integration

MBS Import
42735

This change allows verifying MBS matchups with diamond report. These diamond reports can be processed with a new 'AutoProcess' button on the MBS grid to verify the matchups.

All diamond reports will need the following in the WHERE clause: where keynoh = ??thisform.v1 and userid = '??thisform.v2'

An example of a diamond report could be the following, which makes sure the item ends in 'STAN' if the description from MBS is saddle tan:

```
select * from ztmp_mbsgrid WHERE descrip like '%Saddle Tan%' and icode not like '%STAN' and keynoh = ??thisform.v1 and userid = '??thisform.v2'
```

Rules**: AUTOMBS

Shipping Events (Logistics)

Prompt 74/Prompt 79
43397

Setup options have been added for prompts 74 and 79 so that they sum up the open quantities of all items on the sales order. For example, if item# HDW0001 is on two lines of a sales order, which a quantity of 2 on line 1 and a quantity of 3 on line 3, these options will show the open quantity being 5 instead of 2.

** Additional information for the Setup Options, Rules, and Programs areas

Setup Options:

Setup Options are system-wide controls that must be enabled/disabled in CID Maintenance. Some Setup Options will not display until the related application has been accessed. Contact your consultant for assistance with enabling/disabling Setup Options.

Rules:

Rules are added or updated in the Rule Maintenance screen. If you are not familiar with adding or updating Rule Maintenance headers or details, contact your consultant for assistance.

Programs:

Programs are system-level routines that must be updated manually by ABIS personnel. You must contact your consultant to coordinate updating the associated Program before taking advantage of the enhancement.

Program updates may require system downtime, or may be required to occur outside of business hours.
