

Adjutant Release Notes

Version 1102.388

ECR #	Type	Module/Program	Requested Change:	Change Summary:
19237	UI / Usability	Address Book Organization Air Hammer	Add 'Address3' column to Parents and Children tabs.	Add address3 to grids on parent and children
19247	Enhancement	Auto Alert Due Date Change Alert	Do not create DC event when due date changes to/from .NULL.	Change logic to not create DC and D2 events if current or old duedate is/was NULL on due date change
19238	Enhancement	Import/Export Manager XLS Import logic	Foxpro has trouble importing fields created with ConCatenate function (imported field has a NULL at the beginning, and is missing the last character. Add logic to mapping screen to check first row of data for any NULL leading fields, and warn if found.	Check first data line of mapped date for CHR(0)/NULL leading strings, if found, warn user about using Concatenate function in excel.
19096	Enhancement	Item Control (Inventory) Bill of Material	Add a new flag to the Bill of Material screen that tells the system when the quantity of a lot controlled item must be a continuous length. Do not allow allocation of qtys less than the BOM qty if flag is set (show in Allocate/Serial Lots screen, but highlight in red and do not allow selection). Example: 100 FT of chain are required to assemble a 100 foot finished good part. Lot IDs with less than 100 feet would be excluded if the "continuous" flag were set.	Added a new flag to the Bill of Material screen that tells the system when the quantity of a lot controlled item must be a continuous length. Do not allow allocation of qtys less than the BOM qty if flag is set (show in Allocate/Serial Lots screen, but highlight in red and do not allow selection).
19137	Enhancement	Item Control (Inventory) Inventory Label	Make InvLabel program that builds template file like current system uses. (This way we can use existing lable templetes loaded in printers)	Create invlabel program that passes data to Zebra printer in template feilds. This allows label format to be setup in printer, and allows use of existing labels. Add template name to Label setup screen. If template name is selected, a different set of paramaters is passed to get around foxpro parameter limit of 29 parameters. change print buton on invlable screen to use _LABELTEST item, _LABELTEST Org and first SO with _LABELTEST as SOLDTO when testing lables. Selected Label program is called directly using current printer. If printer is named DEFAULT, then current default windows printer will be used (For laser type lables)

ECR #	Type	Module/Program	Requested Change:	Change Summary:
19231	UI / Usability	Item Control (Inventory) Stock Adjustment	Clear the Serial/Lot field if serial/lot is not found. Do not allow user to adjust qty if serial/lot does not match.	Add code to blank out serial/lot if not valid or escape pressed in list. Add code to qty field to warn if serial/lot not filled in, and required.
19241	Enhancement	Logistics (Shipping Events) Shipping Event Viewer	Change the Shipping Event Viewer to highlight (in orange) sales orders that have a backordered line item.	Make lines with a backorder orange on orders w/o se grid
19242	Enhancement	Logistics (Shipping Events) Shipping Event Master	Add the following columns to the Linked SO tab on the SE Master screen: - Ship To ID - Address1 - City - State - Zip Code - Drop Number	Add Address1, City, State, Zipcode, Dropno columns. Add sort for each column
19243	Enhancement	Logistics (Shipping Events) Shipping Event Master - Drop #s	Change the Linked SO tab to allow a user to change the drop number associated with each SO. Auto-update the drop number for other linked sales orders that have the same ship-to.	Add logic to allow dropno's to be edited in grid and saved back to sesono table ; Change SE Pre and Post Load reports to use new Dropno from SESONO
19244	Enhancement	Logistics (Shipping Events) Packing List Report	Change Post Load Packing List (sepost) to print the SO Line description if the item code is miscellaneous.	Change SEPOST to use sotran description if item is a misc type item
19249	Enhancement	Logistics (Shipping Events) Load SO - Mark as Shipped	Change process to mark items as shipped only if in top level carton. Ask the user if the SE should be marked complete. Allow the user to mark as shipped over and over; add new items to SESHIP, don't dup lines already transferred.	Changed logic to only process top level cartons (log3 of Carton rule = 'y') Once top level carton is processed, it is marked as shipped, and cannot be shipped again Add shipped column to carton list. shipped cartons will be red if not selected. Items cannot be loaded into shipped cartons. Ask if user wants to ship loaded cartons, after ship is

ECR #	Type	Module/Program	Requested Change:	Change Summary:
				done, ask if user wants to mark complete. Allow SE to be shipped multiple times, even if marked complete.
19250	Enhancement	Logistics (Shipping Events) SE Viewer and Load SO - Transfer to SE	Allow user to transfer SO to existing SE or manually transfer to existing SE from same button/window. Add a "Make SE" button to Load SO for backordered lines.	Move Manual Link fields to Transfer page. Add Make SE button to SE Add screen
19227	Enhancement	Order Entry Print Quote and Print Sales Order	Add Inside Salesperson contact information to cursor of Print Quote and Print Sales Order: - Phone Number (office) - Fax Number (fax) - email address	Added Salesperson contact information to cursor of Print Quote and Print Sales Order: - Phone Number (office) - a_spinfo.office - Fax Number (fax) - a_spinfo.fax - email address - a_spinfo.emaila
19232	Enhancement	Order Entry Sales Order Load Date	Add setup option that forces user to fill out Load Date if Sales Order does not have a Load Date when saved. Notification to say, "Warning - Load Date is blank. Please fill out Load Date before saving." Do not allow user to save order without a Load Date.	Create new CID option SOREQLOADDATE, if set, load date is required before header save (estdate)
19235	Enhancement	Order Entry Sales Order & Purchase Order Void	If SO is voided, and line item(s) are linked to a PO, then notify the user of which PO's are linked. If PO is voided, and line item(s) are linked to a SO, then notify the user of which SO's are linked.	Add Messagebox to show user list of POs or SOs linked to voided order
19239	Enhancement	Order Entry Backorder changes	Blank out backorder fields during quote copy on transfer to SE from SE Load screen, only show SE's with ship date > today and less than today + 60 When transferring SOs to new SE from SE Viewer screen, if line is backordered, and SOBOSE field is zero, update with SE that SO is being transferred to	Blank out backorder fields during quote copy on transfer to SE from SE Load screen, only show SE's with ship date > today and less than today + 60 When transferring SOs to new SE from SE Viewer screen, if line is backordered, and SOBOSE field is zero, update with SE that SO is being transferred to

ECR #	Type	Module/Program	Requested Change:	Change Summary:
			When creating new SE from SE Viewer screen. Set all backordered lines on transfered SOs to new SE where SOBOSE field is zero	When creating new SE from SE Viewer screen. Set all backordered lines on transfered SOs to new SE where SOBOSE field is zero
19248	Enhancement	Order Entry Backorders	When line item(s) backordered, ask for new Estimated Delivery Date and Reason. - Add new Est Delivery Date field to SO Detail. - Add new BO Reason field (254 characters) to SO Detail. Display both fields on SO Line Item, SO Quick Line, and Load SO. Add both fields into the email template (BOTABLE and BOLIST).	Add fields to SOTRAN table, show new screen when backordering items to get Date and note. Add new fields to email template blocks (BOTABLE and BOLIST) Add fields to SO grids and SE Load screen grid
19098	Enhancement	Production Allocate Serial/Lots	Add functionality to the SSA screen that allows a user to allocate serial/lot controlled items to a bill of material item on a Sales Order. Automatically assign these serial/lots to the PWO when the order is submitted to production. Add functionality to Assign Serial/Lots tab of the PWO screen that allows a user to select the serial/lots they want to use via the Allocate Serial/Lots screen.	Add functionality to the SSA screen that allows a user to allocate serial/lot controlled items to a bill of material item on a Sales Order. Automatically assign these serial/lots to the PWO when the order is submitted to production. Add functionality to Assign Serial/Lots tab of the PWO screen that allows a user to select the serial/lots they want to use via the Allocate Serial/Lots screen.
19117	UI / Usability	Production Production work order screen	Add new allocate button to allow allocation of item across multiple serialized items (serial items are made as separate line items)	Add new allocate button to allow allocation of item across multiple serialized items (serial items are made as separate line items)
19251	Enhancement	Production Production Work Order	Add columns for On Hand and Available qtls to All Non S/L Inventory tab.	Add Onhand, Avail columns to All Nons S/L tab OHF filter is PWO plant, ownerid and heldfor
19236	Enhancement	Purchase Orders Purchase Order - Department	Set department equal to user/resource default department when adding a PO. If user is not a resource, or does not have a default department, then use the default dept from the DEPT rule.	Add code to default new PO created from PO screen to the users default department (From resource record) if not setup, default to rule default.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
19240	Enhancement	System Manager Database Structure	create program to read table structure, and add any missing defaults (char,int,money,varchar,text fields), then update any nulls in said fields to zero/blank as needed	Create new screen to scan table, and try to create defaults for each column, then try to update NULLs to 0 or blank depending on type of column. Process will show any errors (error if field does not have constraint, and is indexed)
19246	Enhancement	Time and Materials Task Punch Clock	Add option to complete task, bring up linked ECR if linked to one.	Add Complete Task checkbox to TaskTime screen. If checked, TaskPunch will try to complete task, then call up Modal ECR screen if task is linked to ECR. Timesheet note will on clipboard (just like from Quicktime)
