Adjutant Release Notes

Version 1103.399

ECR #	Type	Module/Program	Requested Change:	Change Summary:
19108	Enhancement	Address Book Global Search	Create new screen that allows searching across multiple types of records (see attached for example). Fields that can be search are: - Projects (project name and remarks field) - Organizations (org name) - Contacts (contact full name) - Time Entries (time sheet description) - Task (task name and task description) - Notes (subject and body) - User Defined Fields * Include ability to create and save search templates. * Allow selection of which records to search. * Filter search by Date (add date), Organization (name or ID), Project (number or name), and Resource name. * Include an advanced search option that allows and/or search with multiple keywords. * Show results grouped by record type.	Create search screen per spec.
19323	Enhancement	Commission Tracking New Commission Report	Change Sales Order Type filter to multi-pick list.	Remove zero dollar invoices, remove seamer rental invoices (SOTYPE = E)
19340	Enhancement	Commission Tracking Commission Report	Change commission report (commspec1): Make SO Type filter a multi-select instead of a drop-down. Exclude invoices that have a net steel amount of $0.	Add code to delete invoices with net steel =0 Change SO select to multiselect
19329	Enhancement	Expense Reporting Expense Processing	Change Expense processing to handle new split of Mileage / Tolls	Change to handle split of MILEAGE into MILEAGEM and TOLL. Add code to copy linked files from EXPREport drop folder to AP mast drop folder, and link to new invoice.
19341	Enhancement	Import/Export Manager AP invoice importer	Add validate to txt file option	Add Validate to txt file option.

Adjutant Release Notes

Version 1103.399

ECR #	Type	Module/Program	Requested Change:	Change Summary:
18921	Enhancement	Item Control (Inventory) Inventory	Moved from 18701 Adjutant has multi-owner, multi-location inventory, but cannot track the value of a single serialized item across multiple owners. This change will allow specific items to be flagged as multi-owner and tracked accordingly. - Add logic to handle valuation of multi-owner assemblies.	IF CID option ICSEPBYOWNER is enabled, and item has MULTIOWNER attribute, then the cost by assembled part owner is captured in ITEMMOH,ITEMMOD. Inv On Hand report changed to split out costs for Mulitowner items Item Master serial tab shows both full cost, and other owner cost. Double click on Other cost brings up details of cost breakout
19332	Enhancement	Logistics (Shipping Events) Load Shipping Event	Change logic on 'Mark as Shipped' button to not ship items that are on an intercompany shipping event.	If SE is intercompany, do not run Mark as Shipped Logic on Cartons, just ask to mark SE as complete.
19343	Enhancement	Logistics (Shipping Events) Carton Clean Up Tool	Create screen to allow the removal of old unused Zero SEN cartons	Create screen to destroy selected cartons
19121	Enhancement	Production Printed PWO form	Form needs to handle serialzed items (seriallized items are created with seperate line item records) List of materials needed needs to include all ready assinged items also (Lot/serial items need to have a single line for each lot/serial number)	Change allocated lot/serial logic to group allocated items into lot/serial-OHF-Bin groups (single record per group)
19263	Enhancement	Production Serialized/Asset Items	Create asset tag for serialized, asset type items when assembled in production. Remove asset when unassembled.	Change SO screen to not make asset records for serial items. Change PWO screen to make asset records for serial items. ; Add code to disassemble item to mark asset as inactive if matching asset found (tagid = serial, basedon correct item)
19266	Minor Bug	Production WO Master Screen	Line item pulldown on Yield tab has problems with serial PWO's (all the lines have the same line number)	Process does not work it items or serial numbers have dashes in them (unable to separate serial from part number), Change part - serial separator to pipe character (|)

ECR #	Type	Module/Program	Requested Change:	Change Summary:
19321	Enhancement	Production Production Scheduling	Add three new fields to Production Scheduling screen (schedmasg2): - Qty Assembled: Qty of Non-Reject Yields that have been assembled. - Qty Rejected: Qty of Rejected Yields - Balance: Qty Ord - Qty Assembled - Qty Rejected.	Add QtyAss, QtyReject, QtyBal to cursor, populate using data from PWO detail lines
19331	Enhancement	Project Management Project Backlog Report	Add option on Project Backlog Report to sort by Account Manager.	Add spid (project acct mgr) and accmgr to cursor. Add option to sort if report format is detailed. Create new report form with groupings by accmgr
19336	Enhancement	System Manager Security Tokens	Add Print button to Security Token screen. Add a Show Screens button.	Add Print button and report. Add show all screens button
19322	Enhancement	Time and Materials Quick Time Entry	Add Dept as field on quick time screen (qsupport3). Default to resource's department.	Add Dept dropdown to screen. Default to Resources Dept
19325	Minor Bug	Time and Materials Punch Recovery Logic	Punch Recovery punches do not clear after time entry (in some cases)	Handle cases where TransDate is not equal to midnight
19328	UI / Usability	Time and Materials Resource Time Report	Remove semicolon from start of time entry description.	Change code to only use semicolon between none blank notes

Total Number of Changes: 17
