20161	Enhancement	Coil Tracking/Processing Coil Finder	Change to use Item Master item code and description instead of Coil Receipt Item and Description	Change query to return Itemmaster item and description instead of CoilReciept item and description;

Version 1110.618

ECR #	Type	Module/Program	Requested Change:	Change Summary:
			(Changing item or descrip in item master does not update coil receipt record).	
20120	Enhancement	Contract Management Contract Master	Change audit logging to new version. Add warning if deleting a contract with active tasks.	Added Audit logging to Master, Product and Group Added check to see if inuse before delete Added UserTrace record for delete, and edit ;
20155	Enhancement	Import/Export Manager Import and Convert from CSV	Add options to allow import/convert of CSV files. Create screen to convert CSV file into XLS file that Adjutant likes. Add option to Import screens to directly import CSV files (use convert to make XLS that adjutant likes).	create new process to allow convert of Excel CSV back to Excel XLS using Adjutant. CSV is imported into cursor, cursor is exported back out as XLS file; Logic is used in standalone AdjCSV, which will convert any xls csv file back into xls file that Adjutant will import (Double the 1st row, the import/export process loses one of them) Logic added to coiijump import as test of concept. Can be added to all imports if needed
20144	UI / Usability	Item Control (Inventory) Item Master Screen	Change copy logic to copy notes also.	Notes copied, just not refreshed correctly. Change logic to refresh after copy;
20173	Enhancement	Item Control (Inventory) Item Master Report	Add text2 of COMMCODE rule to cursor of Item Master report.	Add CommCode Description into COMMDESC Field
20199	Enhancement	Item Control (Inventory) Serial/Lots	Remove all leading spaces from serial/lots before saving (PO,PWO, Serial Change etc.)	Remove all leading spaces from serial/lots before saving (PO,PWO, Serial Change etc.)

Version 1110.618

ECR #	Type	Module/Program	Requested Change:	Change Summary:
19941	New Feature	Order Entry Hazardous Materials Handling	<p>The change allows the system to better manage items flagged as hazardous materials.</p> <ul style="list-style-type: none"> - Create a new Item Attribute called HAZMAT. - Change the Bill of Lading screen to automatically assign the HazMat flag for these items. - Change Order Entry system to recognize HazMat attribute and flag accordingly on Sales Order form (add to printso cursor). - Change Production system to recognize HazMat attribute and flag accordingly on Production Work Order form and in Production Scheduling (add to cursor of printpwo). 	<p>Attribute is HAZMAT</p> <p>In PrintSO cursor as hazmat (y/n) c_sodetail.hazmat</p> <p>In PrintPWO cursor as hazmat (y/n) c_pwodetail.hazmat</p> <p>In BOL Items cursor as chazmat (y/n) c_boldetail.chazmat</p> <p>Auto loaded items in BOL are marked with hazmat flag based on cursor.</p>
20174	Enhancement	Order Entry Allocate Serial/Lots	<p>When allocating lots from the Sales Order, change the logic to always allocate full amount when item is a coil.</p> <p>For example, when order qty is 1000 and user selects a coil that is 1050, the full 1050 should be allocated by default.</p>	<p>Add Setup option (SOALLOCATEFULL), if set, allocate whole lot qty when checked</p>
20191	Enhancement	Order Entry Manual Ship Screen	<p>AddAllocate and AddProd do not use loctid to lookup package to get current bin. If lot in multi whses, sometimes bin is incorrect.</p> <p>Change to use OHF to lookup.</p>	<p>Change BinLookup for Prod/Allocate items to use full OHF to find correct bin in itemtrack;</p>
20197	Enhancement	Order Entry Open SO Report	<p>Change logic to link to ENT using SOMAST custid instead of SOTRAN custid (sotran custid is not updated in some cases)</p>	<p>Change query to use SOMAST.custid to link to Org instead of SOTRAN.custid;</p>
20198	Enhancement	Order Entry SO Cost Update	<p>Lock SO Cost once PWO has been assembled to prevent Default BOM Cost from overwriting the actual Production Cost.</p>	<p>Add check for AssemQty<>0, if found, do not update cost with BOM cost on line edit of SO</p>

Version 1110.618

ECR #	Type	Module/Program	Requested Change:	Change Summary:
20169	Enhancement	Production Submit to Production	S2P logic assumes selling unit = stk unit. Change to convert from selling unit to stk unit before sending to production.	Change S2p Logic to convert selling untis to stking units before going to Production ; Continue work on Shipping/S2P/Allocate in non-stk units;
20180	Minor Bug	Production Production Schedule	Labor on Serial Assembles with Qty>1 not correct. (Flattened Serial line only finds labor for qty of 1) Change logic to get total qty to produce, and total qty assembled.	Change logic to use Open Balance to calculate labor totals for lines;
18820	Enhancement	Project Management Project Number Logic	Add new field project table to allow non-keyno to be project number (char 20). Driven from MSN counter, can have prefix, postfix. Cannot be changed from system assigned value. Change all other screens/reports to use the new project number	New MSNNUM fields. Enable with NEWMSNNUM option. Many screens and reports changed to use new logic
20179	Enhancement	Project Management Project Control	- Change 'Responsibility' field to a drop-down that is pulled from a rule. - Allow any contact to be added to the project.	Create new Rule (PROJRESP) text1 = Resp, log1= Default change resp text box to dropdown from rule. Change filter on contracts to allow any contact to be assigned
20204	Enhancement	Project Management Change Order Report	Change to use NEWMSNNUM if needed.	Change to use NEWMSNNUM logic. Change lookup queries to assume SO Number is based on MSNNUM instead of MSNKeyno
20159	Enhancement	Purchase Orders Purchase Order - Hide Line	Add Hide Line and Hide Price logic to Purchase Order Line Items and Print PO.	Add HideLine/HideCost check boxes to PO Screen. Change PrintPO to respect boxes
20160	Minor Bug	Purchase Orders Copy Purchase Order	ReqDate and EstDate not copied from line items during Copy PO process.	Remove code that blanks out Line Item ReqDate and EstDate

Version 1110.618

ECR #	Type	Module/Program	Requested Change:	Change Summary:
20194	Enhancement	Roll Former Integration Display Coil	<p>Add option to allow report of Coil from Display Coil screen. (Requires Manual delete of coil in SmartComm to prevent dup message during import)</p> <p>Add screen to allow dump of all colis from smartcomm, and reimport of current coils</p>	<p>Add button on Display coil screen to put record for coil into AMSCOIL table, Coil will exported in next AMS loop.</p> <p>Create new screen to Send Purge Command, and export all active coils</p> <p>;</p>
20152	Enhancement	System Manager User Trace Logging	<p>Add UserTrace logging to various SE related events. Mark As Ship, Close SE, Create Carton, etc.</p>	<p>Add User Trace logging to various tasks on SE and SEADD screen (Destroy, Load, Unload etc...);</p>
