

Version 1111.664

ECR #	Type	Module/Program	Requested Change:	Change Summary:
20389	Enhancement	Address Book Phone Number Formatting	Create new function to format phone numbers. If 10 digits (Before EXT or EXT. or X), Format at (999) 999-9999. If Ext or Ext. or x in number, add to end of number as (999) 999-9999 Ext 9999. Add to Org and Contact screens.	Create new Formatphone funtion. Use to format phone numbers on ORg and Contact screens;
20398	Minor Bug	Bill of Material Bill of Material	BOM item doesn't show up in Assigned S/L when input = output.	Change logic to handle cases where one of the BOM inputs is the same items as the out put (Disable some netting issues, don't recusivly process inputBOM;
20399	Minor Bug	Bill of Material Bill of Materials Re	Class filter does not appear to work on BOMREPORT.	Correct issue with class filter. Add code to deal with BOM's that have input = output (Coils) , without change, they are flagged as BAD BOM due to recursive issues.
20400	Minor Bug	Bill of Material Update BOM Costs	Cost needs to be factored by output qty. Assumes qty of 1. BOMBASEUP	Divide Calc Wt and Cost by Yield Qty if YieldQty <> 1
20401	Enhancement	Bill of Material Current Cost on BOM	Current cost field on BOM should be divided by output qty. Assumes an output qty of 1.	Divide BOM Cost by Yield qty to get cost per unit
20363	Enhancement	Commission Tracking Commission Plans	Add copy function to Commission Plan screen.	Add copy button. Click on Add, enter Plan name, click on copy, select plan to copy, details will be copied into current plan.
20403	UI / Usability	Import/Export Manager Vendor Import	Change vendor import to add remitto and soldfrom records in pcxref with aclass = 'Y'	Set aclass = Y on SOLDFROM, REMITTO pxcref records. Add phoneformat logic to phone number

Version 1111.664

ECR #	Type	Module/Program	Requested Change:	Change Summary:
20303	New Feature	Item Control (Inventory) Hazardous Materials	<p>Add new hazmat screen as jump screen from HAZMAT item attribute. Screen contains fields from new hazmat table and allows user to select when an item is hazardous based on shipvia.</p> <p>Add new hazmat table with the following columns: - keyno,ikey,adddate,adduser,editdate,edituser, - Proper Shipping Name (memo) [psn] - UN Number (char,10) [unno] - Hazard Class (char, 10) [hclass] - PG (char, 10) [pg] - Label (char, 50) [label] - Packaging (char, 50) [pkg]</p> <p>Add new table to hold shipvia methods for each hazmat item.</p> <p>Change print screens (printso, printpwo, printinv, bol, printse, sepost) to include all fields from hazmat table. Change same print screens to flip hazmat flag according to shipvia.</p>	<p>Created new hazardous material screen to capture all required fields per HM item. Changed Print SO screen to print new fields when needed.; Change HAZMAT screen to add link to SHIPVIA to allow status to change based on shipvia</p> <p>Add all fields to print screens (HM + field name from HazMat)</p> <p>Change logic to use SHIPVIA in check for flag ; Change HAZMAT screen to add link to SHIPVIA to allow status to change based on shipvia</p> <p>Add all fields to print screens (HM + field name from HazMat);</p>
20385	Enhancement	Logistics (Shipping Events) Unload Carton	Allow unload of Non-Stock Transfer Item	Change logic to allow unload of Non_stock transfer item. Save cost into setrans table at production time, use this cost for Itemact records
20397	Enhancement	Logistics (Shipping Events) Post-Load Report	Add soldto information to post-load report. Pull info from first linked SO.	Fill out a_soldto cursor with all ent fields from Org matching soldto on first SO
20355	Enhancement	Order Entry Sales Order Report	<p>Add two new sort/grouping options to the Sales Order Report (openso).</p> <p>1. Group by Item, sort by Load Date. Force report type to Detail. Report is grouped by item, then sorted by Load Date with custno, company, sono, estdate, qty, and unit in the detail bankd.</p> <p>2. Sort by Load Date, then SO#. Report is sorted by load date (header date when in</p>	<p>Add two new sort options</p> <p>Load Date + SONO (sort by somast.estdate + sono in summary, sotran.estdate + sono in detail. Create new reports for both summary and detail)</p> <p>Item + Load Date - Force to detail, make new report</p> <p>Add RFQNOTES,INVNOTES,PWONOTES,BILLNOTES,INTNOTES,SHIPNOTES to cursor</p>

Version 1111.664

ECR #	Type	Module/Program	Requested Change:	Change Summary:
			summary, line date when in detail), then by SO#.	
			Also, verify that all SO Header note types are in cursor of report (SO, PWO, Invoice, PO, Billing, Internal).	
20404	UI / Usability	Order Entry SO Screen	Add HotKey to recalc QtyOpen/Qty Shipped Values (F9)	Add function to recalc qtyopen and qtyshipped values (F9 on so screen when not in edit mode);
20393	UI / Usability	Production PWO Lot Numbering	Default lot numbers in coil production are illogical and repeat when more than nine. XXX-01 should be first number and should be sequential afterwards.	Change to use right Function instead of left to handle seq numbering correctly. Change logic to handle more that 99 splits also.
20395	Enhancement	Production Allocate Serial/Lots	Yields grid doesn't have a sort order. Change to Item and Serial/Lot.	Add index (item + serialnum)
20378	Enhancement	Roll Former Integration AMS Bundle Qty	Do not ever allow qty in single bundle to be more than the qty order. If qty order is 15, and ams data is 17, only put 15 in bundle. If qty is split between two bundles, allow it, since the actual qty in each is not known. If order qty is 15, and bundle A is flagged with 10, and bundle B is flagged with 7, allow both since actual qty in each is not known.	Change logic to count line item qty in current carton, and limit add to max of qty order on SO. IF 15 ordered, and AMS indicates 17 in carton, limit carton to 15. Installed at SBS;

Total Number of Changes: 15
