ECR #	Type	Module/Program	Requested Change:	Change Summary:
21340	UI / Usability	Address Book Contact Air Hammer - Sales Orders	Exclude 'W' type sales orders from Sales Orders tab of Contact Air Hammer.	Add sotype <> 'w' filter to SO query
21321	Enhancement	Inventory Labels Print P Label Screen	Add logic to allow reprint of PL/PD labels also (PWO Labels). Add to scanner also.	Add logic to call G_lpwo2 if code is PD or PL from print Pnumber screen. Make new 53 option on scanner that will take a P,PL or PD scan, and call G_LINV or G_LPWO based on P or PL/PD Make new UPWO label class for new G_LPWO2 labels.
21330	Enhancement	Item Control (Inventory) Scrap Qty Cleanup - WIP	Add option to include WIP qty (if on hand + WIP is greater than scrap qty, then do not show serial/lot).	Add checkbox to include wip. If Checked use CalcPWOWlp function to find PWO wip qty. If OnHand + WIP number is > Filter Number, then drop off list.
21333	Enhancement	Item Control (Inventory) On Order / Allocated	Add a column for Warehouse Name to the On Order and Allocated windows (jump screens are not warehouse specific like the jump screens on the SO and PO screens).	Add whsename column to grids and queries. Add sort on whsename
21334	Minor Bug	Item Control (Inventory) Item Search	Error on Item Search window when sorting columns.	Removed old sorts on numeric columns
21337	Enhancement	Item Control (Inventory) Consignment Usage Report	Change default sort order of report to Owner/Warehouse/Item/Lot Number/Date. Add required logic to include multi-owner assemblies that produced on make-for-stock work orders.	Change PWO Assembly logic to save one of the assembly record's itemact keynos into cost tiers. Add logic to Consig Nite process to link back to Build for Stk PWOs on Non Serial/Lot items thru shipped itemact-CT Usage-CT Table-Assembly Itemact records. ;
21349	UI / Usability	Item Control (Inventory) Item Master	Disable Serial, Lot, and Exp Date tabs accordingly when Item Master is called from other screens.	Handle enable/disable of Lot/Serial/ExpDate tabs correctly. Change to always disable ExpDate tab.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21350	Enhancement	Item Control (Inventory) On Hand popup	Create new pop-up window similar to windows that pop up for the On Order and Allocated links. Add link to RFQ, SO, Purchase Order, and Item Master that calls new screen. Screen has a warehouse filter with an option for 'ALL'. Pass warehouse to filter when called from RFQ, SO, PO. New screen has the following columns: - Warehouse - Current Qty - CW Qty - Bin - Serial/Lot Number - P-Number - Owner - Held For - On Transfer - P-Number Note Highlight allocated serials/lots in red (show key at bottom).	Create new OnHand Screen per spec. Add links to PO,SO,RFQ and ItemMaster Screens
21332	Enhancement	Logistics (Shipping Events) Unload Carton	Change logic to not delete all loose items in master carton when unloading items in carton. If the item is unloaded, delete/change the SESHIP record, but it not unloaded, leave it there.	Remove code that deletes all seship records for loose items when unloading carton. Only delete records for things that were unloaded;
21341	Minor Bug	Logistics (Shipping Events) Carton Destroyed Flag	Change logic to look for destroyed <> 'y' instead of destroyed = 'n'.	Change logic to look for destroyed <> 'y' instead of destroyed = 'n' to handle case where destroyed is blank
21345	Enhancement	Order Entry SO Transfer Screen	Do not allow transfer of items on PWOs. Make Audit log records. Do not allow transfer of items submitted to AMS/SmartComm.	Add checks for PWO link (pwokey <> 0), and line in AMSORDER (keynod = amsorder.item_id) If ether found, do not allow transfer. Make a Auditlog entry for SONO swap Make a UserTrace enter with both SOs in entry

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21342	Minor Bug	Procurement Quick Buy	New version of quick buy does not calculate Projected and Available qtys for the Transfer Source warehouse (all are zero).	calc tprojected and tavail Add logic to recalc onhand in transfer whse for ScrapQty Items.
21343	Enhancement	Procurement CHECKCP	CHECKCP setup option does not pass the right item to quick buy. The SO line item is sent instead of the missing/short item in the BOM. Also, verify/change the logic to only pass CP items to Quick Buy if Projected stock is above the current min qty (including consignment) but all lots are too short to fill the order.	Change logic to handle ContPC items added in from PWO generated from SOs
21351	Enhancement	Procurement Quick Buy	Add "Days Inventory Less Than" filter to Quick Buy.	Add Days Inv < Filter to Filters Tab. Save/Load Filter with settings. Drop out Non-Force in items that have DaysInv< number if number>0
21358	Enhancement	Purchase Orders Generate PO - Drop Ships	Copy ConfirmTo field from SO to PO on drop ship lines.	Change SO Screen PO Gen logic to insert SO ConfirmTo into DropShip POs
21360	Minor Bug	Quoting RFQ - Lock Price	Lock Price flag on RFQ is not passed to SO when quote is converted.	Add logic to convert RFQ to transfer reprice flag.
21348	Enhancement	Roll Former Integration SmartComm-ProdOut Import	Change logic to handle new C record in import file. C record appears to just be a separator, but generates error (first record assumed to be a number (1 to 6)).	Change ProdOut logic to handle new C record in prodout.csv file. Appears to be a spacer record (no other data than the C). First record always a number per the import spec, the C was generating a type mismatch error. Change logic to ignore non 1-6 records.
21325	UI / Usability	System Manager Desktop Shortcuts	Trap errors when generating desktop Icons.	Add code to trap Errors when generating Desktop Icon Buttons
21326	Enhancement	System Manager Menu Item Launch	Trap Bad command line in both showquickfind launch code, menu setup screen, and launch code from menu.	Add code to trap erron when running a screen/program from Screen search/Menu Prompt screen

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21327	Enhancement	System Manager FRX backup Process	Change logic to handle cases where FoxProcess service is not running out of Adjutant folder.	Add check for AdjPath.txt file, if found, use path in file as actual adjutant path (used when Foxprocess is running in a different folder)
21338	UI / Usability	System-Wide / UI Desktop Shortcuts	If shortcuts are off screen at current resolution, ask if they should be moved.	If desktop icons are off screen at current resolution, ask if then should be moved back on screen.;
21354	UI / Usability	System-Wide / UI Organization and Item Search windows	Change org and item search windows to remember maximized window setting.	Add code to restore window to Maximized if closed that way before.
21359	Enhancement	System-Wide / UI Air Hammers	Change Air Hammer screens to only reload on tab click. Do not reload screens when focus is lost on screen and then returned to (drill down screen opened on top and then closed).	Move activate code to click events on all tabs (Org, Item, Asset, Pep)
21362	Enhancement	System-Wide / UI Login	Remove upper right corner text box from login screen.	Remove upper right corner text block.;
21324	Enhancement	Task Management Printing Service Order	Change logic to allow Link Attached button to work when printing service orders.	Change PrintSvr programs to set needed flags to allow Attached Link button to work.;
21328	Enhancement	Task Management Task customer note	Make custom Notes screen for Customer Note, pass in taskID to allow copy of billing note (which is all labor TS entries if task billing note has not be filled out yet).	Make new screen for customer notes. Add buttons to copy Billing notes, and Pending Time notes. Billing notes might not be created yet depending on the order the time is being processed in. ;
21329	Minor Bug	Time and Materials Error on pop up box	thisform.connhandle not found error. See attached screen shot.	Corrected issue with customer note pop-up on Time Entry.
