

Version 1207.877

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21371	Enhancement	Address Book Customer ABC Codes	Make Logic change to handle the cases where customers have dropped out of date selection range (they should be updated to blank).	Add logic to blank out all unlocked codes before writing back new code set. This will handle cases where customers that had a code are no longer in the set based on date range.
21374	Enhancement	Address Book Air Hammers	Add/Verify all AirHammers have Grid Load/Save Logic	Check all 4 air hammers. Add/Verify all have Grid Load/Save Logic;
21391	Minor Bug	Address Book Organization Air Hammer	Organization Air Hammer error.	Change page19 cursor to allow postdate to be null (should not be null, but allow anyway)
21401	Minor Bug	Address Book People Air Hammer	People Air Hammer error.	Change logic to load First tab if no starting tab passed;
21377	Enhancement	Bill of Material Delete of BOM Header	Look for source of delete of BOM headers without deleting BOM Line items	Search code for logic where header is deleted, but line items are not. Found place in RFQ/SO during line delete where custom BOM header is deleted. If user created custom BOM on one line, then used this custom on second line. Then later deleted second line, the custom BOM would be deleted. This would leave line 1 without a BOM, but with bom line items. This matches the data found at MLT. Change logic to not delete non-temp BOMs when deleting lines. Just leave them in the table.
21389	Enhancement	Contract Management Ship CAP/Block items	Change auto-cap contract logic to only use active contracts with end date>shipdate.	Add date filter to contract query. StartDate <= Shipdate and EndDate >= ShipDate. Active already in filter.
21397	UI / Usability	General Ledger AR Dist	Add AddDate2 column to ARDIST Table. Fill out when created (CashRec, Apply ARCredit). Change Superbatch.TransAR to use new adddate2 column.	add adddate2 and adduser2 to ardist. Change CashRec, ARApplyCred, nonarcash, Processcc to fillout Change Superbatch to transfer to GLDIST
21373	Enhancement	Inventory Labels Modification Processor	Add logic to use G_Linv label program if UberLabel is enabled.	Add logic to Mod Processing to use G_Linv if uberlabel is enabled. Pass created qty in cursor, use the qty on label.;

Version 1207.877

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21355	Enhancement	Item Control (Inventory) Item Master - SSA	Add new tab to Item Master, named BOM Availability. New tab is nearly identical to SSA screen, but includes a filter for Warehouse and a field for Qty to Produce on the first sub-tab. The second sub-tab (All Warehouses) is identical to the SSA screen. Disable this new tab if the item does not have a BOM.	Copy SHOWSSA logic into new tab on ItemMaster screen. Convert logic to run from button click on tab.;
21378	Minor Bug	Item Control (Inventory) Cycle Count Screen	Variable ll_exit not defined in all cases before it used. Generates a variable not found error.	Declare ll_exit before loop, and reset at top of each loop.;
21383	Enhancement	Item Control (Inventory) Order/Alloc Screens	Change OnOrder/Allocate screens to show info from From/To Whses for Manual Added Transfer Items.	Change ShowOrder and ShowAllocate to put Transfer in Custno, and FromWhse-->ToWhse in company name for manual transfer items;
21390	Enhancement	Item Control (Inventory) Cycle Count Warehouse Move	Change autotransfer of whse logic to be a setup option. Right now if you scan a package during cyclecount, it is moved to the scanning whse location by default during the commit phase of the cyclecount. If the user has the wrong whse selected in the scanner, it will move items it should not. Change this to be a setup option, and add color code (if not already there) to highlight these items.	Add color key for WHSECHNG (orange) Add setup option to enable whsemoves. Add CID setup option CCOUNTWHSECHNG. Without setup option, scanner will flag scans in otherwise as invalid. ;
21366	Minor Bug	Logistics (Shipping Events) SE Report Screen	SE Report Screen error - Variable 'SHIPNO' is not found.	Correct issue with drilldown to Org Screen from ShipTo column. Change query logic to fill out Shipto correctly.
21376	Enhancement	Logistics (Shipping Events) SE and SO Load Wireless Process	Recalc Outer Carton Wt as items are added.	Create new function to recalc Carton Wt. Call function after adding items to carton;
21392	Enhancement	Logistics (Shipping Events) Worldship Integration	Add Heartbeat process to verify good connection between WS output folder and Running Adj WS server	Add heartbeat function that copies file from Adj WS server to WS export folder, then checks to see if file is there. If so, updates heartbeat status in green, if not, update in RED.

Version 1207.877

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21404	Enhancement	Logistics (Shipping Events) Se Pre Load Report	Change logic to handle cases where items is packed and shipped, then voided, then packed and shipped again	Change logic to handle multiple pack/ship/void cases (ignore shipped = 'y' itemtrack records)
21407	Enhancement	Logistics (Shipping Events) SE Load Screens	Change "Close Sales Order?" prompt to include count of open SO lines. If shipping from SE, open lines in other whses while not be visible.	Add logic to count open lines (SO not complete, Line not void, QtyOpen>0. Show this count in Close Open Sales Orders prompt.
21364	Minor Bug	Message Control Excel Conversion Error	Trap Excel issues in VFPEXCEL convert program.	Add logic to trap error when trying to copy to new XLS file, and alert user that file cannot be created.
21363	Enhancement	Order Entry SO - Production Schedule	Add sort orders to every column. Add drill downs to Item and Missing Item.	Change default sort to line item. Change Build logic to work when items have not been sent to production yet. Add sorts to all columns. Add drill downs to Item and Missing Item.
21365	Minor Bug	Order Entry SO Screen	Record out of range error.	Add trap on screen refresh to supress invalid error message;
21380	Minor Bug	Order Entry Sales Order - Reset Production	Reset Prod Flags does not always work on header edit of Load Date,ShipTo or ShipVia. Change logic to use keynoh instead of sono when updating sotran.	Change ResetProd logic to use keynoh when running bulkupdate in sotran instead of SONO. Sono did not work in all cases.;
21352	Enhancement	Procurement Vendor Lead Times	Add a new field on Sold From for "Default Lead Time" in days. Change PO Header Req Date and Est Date to use this new field if it is not zero. New hierarchy for lead time calculation on a line item is vpart, soldfrom, rule, system default All places that generate POs need to be changed to use this new logic.	Added lead time field to SOLDFROM table and screen. Change PO screen to use to value to calc estdate and reqdate.; Made new function to calculate lead time based on Vpart/SoldFrom/Rule/System default basis. Changed SO screen and QQBUYL to use new logic.; Add logic to PO screen for line items. ; Change SO screen to use line estdate for reqdate if line estdate is less than calc reqdate;

Version 1207.877

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21346	Enhancement	Production Submit to Production	<p>Add new setup option, PFSPWOBIN, that moves non serial/lot stock items from an inventory bin into the PWO Bin.</p> <p>If qty exists in probin, then move from probin.</p> <p>If qty exists in only one bin (regardless of whether it is probin), then move from that bin.</p> <p>If qty exists in more than one bin, then ask user which bin(s) to move inventory from.</p> <p>This allows the user to move the pulled from stock qty to the PWO bin in the warehouse to signify the stock as allocated for an order in production.</p>	<p>Add column to S2p Screen for move bin. If filled out, move PullFromStk qty to that bin (if possible); Remove MoveBin Field per ECR change. Add new logic to move from ProBin if possible, from only bin if just one, otherwise show screen and allow user to select bin to transfer from.</p> <p>Only run for non serial/lot items, and only if setup option is enabled.; Continue work on new change. Add logic to MoveBin screen to only allow moving the matching PullFromStk qty, and do not allow move of more than in bin, or neg qty;</p>
21347	Enhancement	Production Print PWO - Pull from Stock	Add Pull from Stock Qty to cursor of Single and Multi Production Work Order forms.	Add PullFromStk to c_pwodetail cursor as c_pwodetail.pullfromstk
21387	Enhancement	Production Check Continuous Piece (checkcp)	Change CheckCP logic to check for other owner consignment items before adding item to QB list.	Remove owner restrictions when checking onhand qty.
21394	Enhancement	Project Management Project Control - Payables	Add new "Payables" tab to Project Control. Copy columns and filters from Organization Air Hammer, but show all invoices by default (don't check the Open Invoices box by default).	Add Payables tab to Project control (Like OrgAirhamer payables tab);
21384	Minor Bug	Purchase Orders PO Receipt Consolidated	Error on report - user entered invalid date.	Correct issue with basetype of thisform.sdate and thisform.edate to make Date format filter work. Now invalid dates cannot be entered into date filters.
21393	Enhancement	Purchase Orders PO Return of Coil with StkUnit = LBS	Check Return logic for coils stocked in LBS.	Change POREC logic to handle coils stocked in LBS. Tested returns in both LBS and FT for LBS Stk coils, and both LBS and FT for FT stk coils.;
21357	Enhancement	Quoting RFQ - PO Line Note	Add PO Note to RFQ Line Notes. Pass note to lines on generated PO's from RFQ.	Change label on Shipping Note to PO Note when in detail mode. Verify PO Line note is copied to Bid POs and moved to PO when converted

Version 1207.877

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21361	Enhancement	Quoting Convert RFQ - SO Type requires freight	Add function "Choose Freight Item to add to SO" when SO Type requires a freight item (SOTYPE log10 = 'y'). Pop up window with list of freight items and force user to choose one.	Add step to convert process to check for FRT line on new SO if SOTYPE has log10 = 'y'. If not found, add a FRT line at line 0. If more than 1 frt type item defined in system, show a list and make user pick item to use. Add qty = 1, cost and price = 0
21379	Minor Bug	Quoting Quote Header Note	Header notes on RFQ not converted to SO (shipping note was example - believed to have been converted into the internal note instead of the SO Shipping note).	Correct Header insert logic to save Bill/Int and shipping notes into correct fields.;
21382	Enhancement	Quoting Quote - Notes	Verify the all notes save correctly (both Header and Line Item). They appear to get mixed up at times.	Check to see that all notes save into correct fields on insert/update for both Header and Line items;
21367	Enhancement	Roll Former Integration AMS Usage Processing	Add logic to include reclaimed qty as usage (like goodfeet and scrapfeet).	Change import to divide reclaimed by 12 to convert to FT, and to put records with reclaim values into amsproduce during import Change Usage program to use good+scrap+reclaim as total usage number; Build New Service EXE. Install at SBS. Run query to update existing lines with reclaimed qty to reflect FT instead of inches.;
21402	Enhancement	System-Wide / UI Adjutant UI Controls	Move Controls logic does not handle items on nested pageframes (pageFrames inside other PageFrames).	Change logic to support nested pageframes
21403	UI / Usability	System-Wide / UI Load/Save Grid Settings	Load/Save Grid Settings does not handle grids on nested pageframes (pageFrames inside other PageFrames).	Change logic to support grids on nested page frames
21399	UI / Usability	Task Management Task Entry - tab order	Tab order moves from Zone to CN button instead of to Save button.	Change tab order of buttons to move PO and CN to match order on screen

Version 1207.877

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21398	Enhancement	Warehouse Management System TermControlC/TermControlS	Add some logic to process to allow more than one TermControlC/TermControlS pair to run on the same database. Create a SetID file in the folders, change the SQL Queries to use this SetID to limit the data transfer to just that set. This way multiple sets can run out of different folders.	Add SiteID to termstatus table. TermControlS/TermControlC pick up SiteID from file in running folder named TermSiteID.txt. The S/C pair will only read/write matching SiteID data. ; Run data updates to support new change at SBS, work with Victor to get installed. Verify screens using new SiteID field;
21385	UI / Usability	Work Flow Routing Route Screen	Do not allow routes to be saved with blank route names	Add check for blank Route Name;

Total Number of Changes: 38
