

Version 1207.882

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21411	Enhancement	Address Book Customer ABC Codes	Add new option to allow calc of Sales/Profit by % of Total Sales/Profit or # of Customers. Current logic uses # of Customers, add logic for % of Total Sales.	Add new Percent of Sales/Profit option to Sales and Profit Calcs. Default to use this calc instead of # of Customers Calc.;
21430	UI / Usability	Address Book Organization Air Hammer	Verify that all columns in Organization Air Hammer are read only.	Make sure all grids are readonly
21409	Minor Bug	General Ledger Bank Reconciliation	Check/Verify that Cleared Update does not cross CIDs.	Change Clear Check logic to use Vendid to limit updates to matching CID when clearing checks;
21339	Enhancement	Item Control (Inventory) Stock Out Report	Create new report that shows items that meet the following criteria: 1. Available Qty is <= x days inventory based on x days trend (one of the inventory buckets) 2. Stocked out x number of times within date range with min qty > 0 3. Items with min = 0 and ordered x number of times within same date range as above Save user options on screen. Add Owner and Whse Filter Setup Report in 3 sections, allow same IOHF in each section Sort by Type, Owner, Whse, Item.	Build report per spec. Report split into three sections, one for each logic block. Items can be in all three. Items are by OHF
21414	UI / Usability	Item Control (Inventory) Warehouses - Accounts	Accounts tab of Warehouses screen does not refresh accounts correctly when scrolling through records.	Correct issue with scrolling
21415	Enhancement	Item Control (Inventory) Warehouses - Accounts	Add "Copy From" function to copy all accounts for all owners from one warehouse to another.	Add copy button to allow copy of all accounts from another whse. All current accounts are deleted
21416	Enhancement	Item Control (Inventory) Item Master - OHF Accounts	Change OHF tab to blank out accounts on new OHF record.	Added logic to blank out OHF accounts on new OHF record.

Version 1207.882

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21419	Enhancement	Item Control (Inventory) Consignment Transfers	Check Query logic to improve speed.	Step one found to be slowest step, add index on pswnum in itemact. Report is now much faster Index added to master index lest
21410	Enhancement	Logistics (Shipping Events) Load Shipping Event - UI and Logic Changes	<ul style="list-style-type: none"> - Freight Pricing not Entered message - remove if calcshipship is on. This message is not required since the freight window will pop up. - Add Setup option to not allow user to change date of shipment (do not display the calendar window). - Add Setup option (SOAUTOCLOSE) to either close or leave SO open depending on if everything shipped. If all qtys shipped, then close SO. If any qtys open, leave SO open. Ignore freight. - Remove notification that SE is complete (user is asked to complete the SE, then clicks yes, then is told that they clicked yes). - If SE is marked complete and there are no other linked SE's for the same warehouse and there are open lines in that warehouse, then ask to create a new shipping event for the open lines. If yes, then open SE screen and populate with SO information. 	<p>Do not show Freight Pricing message if CalcShipShip is enabled. Remove date popup, use current date as shipping date. Add Setup option (SOAUTOCLOSE) , if enabled, and no open lines, SO will be closed, else it will be left open. Remove notification that SE is complete. IF SE marked complete, and there are still open lines for this whse, and there are open SE's linked to the SO, Prompt to create a new SE, and link all SO's to it.</p>
21429	Minor Bug	Logistics (Shipping Events) Add Transfer Items	If lot/serial added using Multi-Select, then another item added without using multi-select, the old multi-select cursor is used to add the item (so the lot/serial and qtys are wrong)	Multitransfer flag and cursor not cleared after add, this forced the next transfer transfer the same lot/serial and qtys if not a multiselect. Change logic to clear cursor and flag after add.;
21426	Minor Bug	Procurement QuickBuy - Add Item	QuickBuy - Add Item - Error.	Correct query in fulltext mode to qualify cid and descrip
21408	Enhancement	Production Production WIP Report	Add a new summary version of the Production WIP Report that does not display any of the input items. Only display the PWO Number, the PWO Due Date, the Output Item and description, the Qty Open to assemble, and the total cost in WIP.	Add Summary option, change logic to roll costs onto single line per wono/output item, delete other lines; Add logic to calc qty unassembled in summary mode, and put in qtyopen field;
21417	Enhancement	Production PWO WIP Report	Add Owner Filter to Report (PWOWSUMMARY).	Add OwnerID filter to PWO Wip Report

Version 1207.882

ECR #	Type	Module/Program	Requested Change:	Change Summary:
21427	UI / Usability	Quoting Convert RFQ	Fill out ActQty with OrdQty on Convert of RFQ.	Set ActQty = OrdQty on Convert
21412	Enhancement	Task Management Other Task Generator	Change Price to take 4 decimals	Change Price to use 4 dec places, round to 2 for extrprice;
21421	Minor Bug	Warehouse Managment System Wireless Assembly	Correct issue with Lot number on AY Assembly records (saved into Serial instead of Lot).	Change Wireless Assembly logic to put lot number in correct field in ItemAct AY Record.;
21434	UI / Usability	Web - CRM Tools Cphone Active Flag	Change logic to delete inactive Cphone records instead of flagging as inactive.	Change contact screen to delete inactive cphone records instead of marking as inactive.;
