

## Version 1301.996

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22076	Enhancement	Accounts Payable 1099s	Update Current Year and Last year labels with dynamic year Example 1099 Amt (2013).	Change Remitto to show year labels on Current and Last year 1099 amounts. Make same change on Recalc 1099 change.;
22075	Enhancement	Accounts Receivable Void Invoice process	When an invoice is voided, the billcycle is removed from the original invoice. It also needs to be removed from the credit.	Remove BillCycle from voided invocie when generated.;
22067	Enhancement	Address Book Ship To - KeyMap	Make KeyMap field larger.	Change shipto screen to allow 20 char keymap field. Change db field to 20 chars;
22071	Enhancement	Address Book Fusion Map codes	Change county logic to copy over fusion map codes from zipmbma when county is changed on Org or ADDSHIP screens. Run query to update existing data. Change ZipMBMA screen to allow edit of codes.	Create XLSUpdate files to transfer FM codes from ABIS database to MLT database. Run XLS updates. Change Org Screen to update new FM fields in database. Change AddShipTo screen to fill out new FM fields in database; Change County Maint Screen to allow edit/add of FM codes;  XLS update files on FTP server
22091	Enhancement	Auto Alert Alert Processing	Send Approve/Reject emails to person linked to expense report instead of add user.	Change PendAppr screen to use Expense Report contact as source of email address when sending approved or rejected emails
22073	Enhancement	Configurator Configurable Item Import	Set noreprice flag to 'n' on Configurable Item Import. Field is not filled out right now and produces error when config screen is opened.	Set socquestion.noreprice = 'n' during import
22062	Enhancement	EDI GS128 labels on SE Load screen	Add option to prompt for number of labels to print.	Add prompt for number of labels to print. Range is 1 to 20, if outside range, print 1 label.;
22064	Enhancement	EDI GS128 Label	Allow generation of GG128 label/ EDI856 for Fastenal orders that are not EDI controlled (not generated from 850).	Start working on changes to allow GS128 to be printed for non-EDI controlled orders. Add VNCode/Name to BillTO screen. Change GS128 program to get ISA data from BILLTO record instead of EDIPOH if no EDIPOH

## Version 1301.996

ECR #	Type	Module/Program	Requested Change:	Change Summary:
				record linked.; Generate 856s for same order, one linked to 850, one not, compare 856s to verify format. Add checks for BillTO edi codes and shipto branch code before allowing printing of GS128 and 856 Generation;
22065	Enhancement	EDI Packing Packing Labels	Create process to print package packing labels for Fastenal EDI orders.	Create label template for new Fastenal Package label. Create program to print them from loaded cartons; Add question to prompt for number of sets to print; Printer is defined on text2 of gs128 rule (currently setup on 4x3 lables or so, could be squeezed onto 4x2). Template is faspacktemp1.txt (On FTP)
22094	Enhancement	Expense Reporting AP Posting Date	Add new setup option, EXPRPTPOSTDATE, that uses the last day of the expense report to set the AP Posting Date. If CID posting window is outside of the date, then use today's date.	Add setup option (EXPRPTPOSTDATE), if set, use last date of exp report as invoice/post date if within CID posting window. If outside window, use today.
22072	Enhancement	Invoicing/Shipping Ship Sales Order	Change SESHIP rollup logic to update all locked SESHIP records with valid ItemAct Keyno when shipping (this is used when voiding to clear correct SESHIP lines).	Add logic to mark all checked 0 qty SESHIP loaded records with a valid itemact keyno (even though they were not actually shipped), this keyno is used to reset them if the invoice is voided.;
22046	UI / Usability	Item Control (Inventory) Itemtrack	Set itemtrack.lot and itemtrack.serial to blank when item is changed from serial/lot to non-serial/lot.	If lot or serial flags are changed to N, blank out lot or serial numbers from itemtrack records
22068	Enhancement	Item Control (Inventory) BOM Screen	BOM Screen shows entered Vendor in grid, but actual PO vendor on screen if PO generated. Change both to show entered Vendor until PO is generated, then show PO Vendor.	Change BOM screen to use same logic in grid and displayed values (display entered vendor until PO is generated, then display actual vendor);
22080	UI / Usability	Item Control (Inventory) Inventory Transfers - Serials	Clear out Serial# field when transferring more than one serial number (when qty > 1). If user enters serial number, the serial is transferred to the serial grid, but program will not allow the transfer since it thinks you are trying to transfer more than one of that serial number (see attached).	Blank out serial field if qty to transfer>1 and item is serial based.

## Version 1301.996

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22090	Enhancement	Item Control (Inventory) Item Master - Cost Tiers	Logic is flip-flopped on 'Show All' checkbox for SI tiers.	Verify that Show all shows the inactive tiers, unchecked only shows active tiers.
22092	Minor Bug	Logistics (Shipping Events) SE Transfers	Change logic to handle other owner and other cost.	Add logic to UnloadCart to handle other cost (transfer other cost to new cost tier, post other cost correctly);
22096	UI / Usability	Order Entry Projected Sales Report	Disable talk, change to exclude templates and W type orders.	Set talk off, exclude templates and W type SOs;
22093	UI / Usability	Project Management Project Number	Change Organization Air Hammer (projects tab and sales order tab and invoices tab) and Purchase Order (line items) grids to display msn.msnum instead of msn.keyno in "project #" columns.	Change Project , SO and Invoice tabs to show project number instead of ProjID. Change PO line items grid on PO Screen to show proj number.
22086	Enhancement	Quoting RFQ screen	Label is wrong on RFQ screen for RFQ Number (Isono instead of lrfqno).	Change label to lrfqno
22100	Enhancement	Quoting Print RFQ	Add billto and soldto cursors into Print RFQ. Swap mailing address fields out for physical address when mailing address is found.	Add new a_billto and a_soldto cursors. Swap address fields with mailing address fields if mailing address filled out. Swap address in existing a_ent cursor. Make same change in PDF maker
22085	Enhancement	Report Sets Min Max Report	Add Report Set logic to Min-Max Report.	Add Report Set logic to MinMax Report;
22066	Enhancement	Tapping Tap Setup - Filter Builders based on District	Change tap setup screen to filter builder list based on builders setup as children of district (BUILDER attribute). Enable with setup option.	Change filter builders based on linked builder children attributes, enable with setup option;
22074	Enhancement	Task Management Working Service Order	Build a cursor with resource info (used passed assignment if one passed). Save name into lc_resname.	Load resource info into zresource for working service order (all fields from resource table), name is also in lc_name variable.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22101	Enhancement	Task Management Task Grid	Add dedicated columns for 'Add Date' and 'Complete Date' into Task Grid. Add sort orders to both columns.	Add Adddate and CompDate to grid, add sorts to columns
22102	Minor Bug	Task Management Task Entry	When I try to add items to material on task I am getting this error.	Trap call to getprice to handle bad return. Need to be changed to use newer version of getprice call.;
22070	Enhancement	Time Billing Billing Summary Report	Add option to sort by workcat/shipto(name)/compdate. Create matching report form.	Add new sort option to bill summary report, Create new report for option.;
22015	Enhancement	Warehouse Managment System Welding Scanning process	Change Defect list to: <ol style="list-style-type: none"> <li>1. Porosity</li> <li>2. Undercut</li> <li>3. Cracks</li> <li>4. Incomplete Fusion</li> <li>5. Excessive Reinforcement</li> <li>6. Undersized Weld</li> <li>7. Overlap</li> <li>8. Missed/incorrect weld location</li> </ol> <p>Add new screen after with:</p> <p>Corrective Action</p> <ol style="list-style-type: none"> <li>1. Back gouge and Re Weld</li> <li>2. Reinforce/Add Weld</li> <li>3. Grind and Re weld.</li> <li>4. Re weld</li> </ol> <p>Then Comment screen.</p> <p>Add new option to mark as complete, then alert user is scanned part has been completed.</p>	Discuss changes with Tanner; Changed defect list. Added new Corrective action screen after defect list. Added new Item Complete for Now screen. Show complete status after entering part number.;
22063	Enhancement	Warehouse Managment System Carton Loading	Do not allow loading of items into a carton with lock flag set (cartrack.clock). Change wireless terminals to respect, desktop and web.	Add new Locked flag / toggle button on carton status screen. Change SE Load screens to allow adding of items into locked cartons.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
				Change wireless load programs to not allow adding of items into locked cartons;

Total Number of Changes: 28
