

## Version 1302.1005

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22118	UI / Usability	Accounts Receivable Bill To	Change billto screen to validate AR Acct on lost focus and on Save of screen. Do not allow invalid accounts. Change batch generator to only set ar acct on billmast if account on billto is valid. Otherwise, always use CID AR Account.	Add check for valid AR account. Blank out, and warn user on save if not valid. Add check for blank AR account in transship in Batch Generation, fall back to CID AR account if Billto Account is not filled out completely
22125	Enhancement	Accounts Receivable Print Invoice Screen	Add option to print by Auto-Process type (allow just the printing of auto-fax, to resend a batch of faxes that failed for example).	Add option to filter invoice list by Auto code. Most useful if PRINTINVSPECDATE is enabled to allow printing by date range.
22117	Enhancement	Address Book Contact Screen	Remove outlook code from email labels, always use sendmail2 screen to send emails.	Change email/text drilldowns to use Sendmail2 screen (remove outlook support);
22128	Enhancement	Expense Reporting Expense Report Processing	Change to handle alternate types for Misc items (o1,o2 etc) so that GL Distributions are correct by miscellaneous type.	Change expense processor to handle different types of other expenses (O1, O2 etc..);
22119	Enhancement	Item Control (Inventory) Wire Rope	Add three new fields to the wirerope table and screen: - Size (char(2)) - Inches (decimal(18,8)) - Legs (numeric, no dec qty)  Size is specified by new rule, WIRESIZE. text1 is descrip (10 char) , text2 is code (2 char).  Add label captions to all labels on wirerope.	Add legs, inches and size to screen and table.
22129	Minor Bug	Item Control (Inventory) Scrap Qty Clean Up - Posting Window	Change scrap screen to respect posting window.	Add posting window check to CleanInv screen;
22104	Enhancement	Mail Reader AddNote emails	Add option to suppress addnote emails.	Add setup option NOADDNOTE, when enabled, do not process the addnote event.;

## Version 1302.1005

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22120	Enhancement	Mail Reader Task Reader	Add logic to force custno tag to soldto if tagged custno does not have soldto attribe. Use email customer if no soldto can be found.	Add logic to check for SOLDTO attribute on both email and custno tag match. If custno does not have soldto attribute, try to find a linked soldto to use instead.;
22124	Enhancement	Mail Reader Task Reader	Check custno for shipto attribute before using a shipto, fall back to found soldto if not, fall back to unknown if neither.	Make change to check for SHIPTO attribute for Task Client, fall back to SOLDTO if not shipto.;
22114	Enhancement	Message Control AutoBatch Fax generation	Add check for existing of drop file when running in VSI mode. Check to see if file copied to VSI drop folder, flag status of copy in log entry that is made into autolog.	Add logic to faxit program to check for message file in VSI fax queue after copy . If file is missing, set flag to log issue , warn user if not in service mode.;
22122	UI / Usability	Production PWO screen	Do not allow entry of lot or serial if item is not lot or serial controlled. Blank out on assembly if not serial/lot controlled at assembly time.	Add more logic to lock/unlock serial fields based on serial/lot status of item.;; Blank out serial/lot if not serial/lot item, and serial entered.
22109	Enhancement	Project Management Project Control - Tasks	Add Project number, Project ID, and Project Name to cursor of Project Tasks report (print from tasks tab).	Add Project number, Name and ID to c_task cursor (msnnum, msname, msnid);
22116	UI / Usability	Purchase Orders PO Screen Creation	Add trap for POFORM not being created, exit PO screen if found.	Add trapped check for POFORM, if not found, show message instead of generating error. Exit/Restart of adjutant should allow screen to load.
22113	Enhancement	Report Sets AutoBatch	Add autolog entries for CIDS that were locked at generation time, and logs for CIDS that are skipped due to setup issues (Accounting setup tab).	Add skip reason to autolog entry if batch process skipped for bad setup (no DEFDEF or CID accounts missing) Locked flag is ignored by autoprocess (processed anyway);
22127	Minor Bug	Report Sets Auto Processor	Stopping on Lic will expire messagebox if close to license end date.	Remove messagebox after license check. Will stop running if license expires, but will not show messagebox (which stop the service)

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22107	Enhancement	System Manager User Screen	Add none button on new user security/option tabs to clear all checkboxes.	Add buttons to clear all checkboxes when in edit mode on New Security and New Options tabs.;
22112	New Feature	System Manager Clean Temp Files	Create version of temp file cleanup that runs as night process	Create version of Temp File cleanup, add to ItemDetUp service, run at 5 am;
22126	Enhancement	Task Management Print Working Service Order	Add shipto.custno to main cursor.	Change Print working service order program to put shipto custno into main cursor (shipno)
