

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22322	UI / Usability	Address Book Custno AuotGenerate logic	Logic assumes a 6 char custno, 3 letters, 3 digit number, starting at 001. If all possible custnos are in use (ABC001 to ABC999), the auto number logic gets stuck in loop. Change to expand to 4 digits, then 5 if needed. Update in Org Screen, AddShipTo, Import Cust/Vend etc..	Change auto-custno logic to handle cases where all the 3 digit custno are in use, move to 4 digit number, then 5 if needed.;
22271	Enhancement	Email Integration Configuration for GFI Fax	Format Faxit to build a GFI compatible file that will copy the Adjutant's PDF and control file into the drop folder where the GFI fax server can find it.	Change fax generation logic to handle new fax server (GFI). Build correctly formatted .txt file put into GFI dropfolder.;
				FAXSERVER rule controls how faxes are delivered to GFI server. Text1 (Drop Folder) is unc path to fax server drop folder text2 (Server Type) is server type (GFI) text3 (Server Mode) is server mode (DROPFOLDER) text4 (Server Email) is not used text5 (AttachType) is attachment type (PDF) text6 (CoverSheet Name) is coversheet name (NONE) Num1 (Whse ID) is whse keyno (175) Users need to have FaxServer (FaxPress) set to GFI, this will enable the fax button on message control.
22314	Enhancement	Expense Reporting Desktop Print Expense Report	Change logic to use new printexp service logic.	Correct issue with missing license key for image converter. Install new version at SBS and ABIS Screen was using AdjExp service.
22292	Enhancement	Import/Export Manager UDF Import	Add functionality to import UDFs for an Asset.	Change UDF Import to allow import to an asset.;
22278	Enhancement	Logistics (Shipping Events) Shipping Event Master	Add audit logging to Shipping Event Master.	Add auditing to SE master tab. Add F11 command to show auditlog

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22302	Enhancement	Message Control PDF Maker	Add logic to clean out z9 tmp files from running folder.	Add code to main loop to delete z9 tmp files older than 1 day
22305	Enhancement	Production Production Cost Update of SO	Add logic to update header editdate to force update of timestamp to prevent overwrite of old data from edit of already loaded SO.	Update SOMAST edituser and editdate at same time. This will force reload of SO if open during assembly.;
22286	Enhancement	Task Management AFI Generator	- Add option to override asset routes with another route (for monthly inspections instead of annual inspections). - Add ShipTo custno and company into the grid with drilldown to Organization. Add sort orders to new columns.	Add option to allow running alternate route instead of asset defined routes. Add Shipto,shipname to grid, add sorts ;
22308	Enhancement	Task Management WO Generator	Change to check for ent.active = 'y'	Add logic to check for ent.active = 'y' when loading addresses into lower grid.;
