

Version 1305.1085

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22457	Enhancement	Accounting Connector PFSPWOBIN	Add new setup option that mimics PFSPWOBIN (original ECR 21346), but pops up the bin transfer screen every time.	Add new setup option PFSPWOBINA, that works like PFSPWOBIN, but always shows the bin list as long as there is at least one bin with the item in it.
22454	Enhancement	Accounts Receivable Cash Receipts	Add sorts to lower grid (invoice number, invoice date and invoice amount).	Add sorts to Invoice #, Invoice Date and Invoice Amount in lower grid.;
22282	Enhancement	Address Book Org Air Hammer-Ship To Show Invoices	Add logic to the Org Air Hammer screen which allows user to see the invoices associated with a ShipTo/Location (SalesOrder/Task), not just the Customer/RemitTo. Invoices displayed will be drillable. Currently system only displays invoices for the Customer associated.	Change invoice query to also load invoices where any of the invoice line items has the shipto = Master Organization
22453	Enhancement	Address Book Org Air Hammer	Add Date range expression for reports.	Create variable to hold date range for reports. Variable is lc_daterange. It will have All Dates if the All box is checked, otherwise it will have 99/99/99 to 99/99/99 ;
22455	Enhancement	Commission Tracking Commission Calculator	Change manual add logic to make commission fully payable once committed.	Add logic to handle holding and saving manual commissions. Reset to 100% on order when reloaded.;
22451	Enhancement	Document Imaging ProDrop Service	Change prodrop to process both first drop folder path and second drop folder path.	Change prodrop logic to process both text2 and text5 folder if filled out. Build new version, install at sbs.
22456	Enhancement	Document Imaging Prodrop service	Create new log file to log files that ProDrop cannot move. Create alert to email list to user.	Create new log table to hold files with move issues. Email list at end of loop. Email address comes from new ProDropAlert rule.;
22460	Enhancement	EDI EDI Modification	Change Westform EDI to use soldto info in N1*ST block instead of shipto info.	Change logic so the N1*ST block uses soldto data. This makes the N1*ST block exactly the same as the N1*SO block.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22459	Enhancement	Item Control (Inventory) Item Master - datein	Add itemtrack.datein (date only) as a column to the Lot# and Serial# tabs on the Item Master.	Add datein to serial and lot tabs
22428	Enhancement	Mail Reader Inbox Reader	MSNNameFolder logic should only be applied for msn drop items, is being applied to all items right now.	Change inbox reader to only apply MSN Name logic for MSN coded items.
22458	Enhancement	Mail Reader Mail Reader/Inbox Reader	Change .txt file logic to look for = in config lines, and just pull data after the '=' Inboxtext.txt can now be setup like this: Exclude1=domain1.com Exclude2=domain2.com Exclude3=domain3.com POP Server=pop.gmail.com POP User=johndoe@gmail.com POP Password=xxx SMTP Server=smtp.emailsrvr.com SMTP User=johndoe@abiscorp.com SMTP Password=xxx LOOP Seconds=60 CID=DEMO ESMTP=yes POP Port=995 Voucher Login=johndoe@gmail.com Voucher Password=xxx IMAP Server=imap.gmail.com IMAP User=johndoe@gmail.com IMAP Password=xxx IMAP Mailbox=inbox IMAP Port=993 IMAP Use SSL=yes Expense UserID=johndoe@gmail.com Expense Password=xxx Everything before the = is ignored. The order still matters, but the verbiage before the = does not.	Add logic to ignore info before the = sign, this will allow the config files to be easier to read (since they have so many options now);
22436	Enhancement	Order Entry PWO Preallocation from SO	Remove zero qty items from SOALLOCATE Screen when called from SSA screen.	Add Pre-allocate BOM button to SSA screen to replace right click when pre allocating to BOM lines.

Version 1305.1085

ECR #	Type	Module/Program	Requested Change:	Change Summary:
		Screen (SSA)	Make BOM allocated items appear on allocate screens (both the SOALLOCATE and the allocate history screen from item master). Add button to ssa screen to call so allocate screen instead of right click.	Change AllocHist screen to show details of BOM pre-allocates ;
22442	Minor Bug	Order Entry SO Screen	Reload from server logic changes record pointer back to first line item. A delete of line 2 that causes a reload will acutally delete line 1.	Change logic to reload current line item if SO is reloaded do to change from another process. Make same change in RFQ screen
22413	Enhancement	Production Print PWO	Add unit cost (of assemblies) into cursor of Print PWO.	Add new field to c_pwodetail cursor (assemcost), calc unit cost of assembled lines, and insert into new field.;
22430	Enhancement	Production Assign Serial/Lots [bomallocate]	Change bomallocate screen to highlight (orange) lots that are already assigned (in WIP) to another PWO. Change 'Qty in WIP' and 'On Hand + WIP' columns to be lot-specific. Change caption of "Too Small" to "Too Short" and add color key for "Assigned on other PWO."	Verify wip numbers are just for item lot/serial Change too small to too short.; Add new fields to hold otherwip (wipped into other orders), use this field to set orange color.;
22447	Enhancement	Sales Tax Automation Sales Tax - Solution Codes	Change solution code lines to set taxable flag to 'y' and calculate tax amount accordingly.	Add logic to tax solution code phantoms generated from contract based solution code pricing
22449	Enhancement	System Manager CID screen	Change CID Screen to allow edit of ecr column on setup options tab.	Change to make ecr field editable during edit, write changes back to rule table (all CIDS) on lost focus of field if not blank.;
22364	Minor Bug	Tapping District Cash Receipts	Report is not correct when multiple taps are paid on one check.	Look at logic for building cash receipt records for tap payments, found issue with lookup of tap fee. Change logic, run tests with multiple taps on same check. Cash Receipt report correct.
22452	Enhancement	Time and Materials Resource Time Summary	Add department and work category to cursor of Resource Time report (emptime).	Add dcode, wcode, dept and workcat to detailed cursor.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22426	Enhancement	Warehouse Managment System Wireless Wending scans	Add line to show number of unscanned pieces to wireless display (number that have not been marked as complete for now).	Add display line to show count of unscanned pieces for this PL number

Total Number of Changes: 20
