

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22558	New Feature	Asset Tracking Sling Inspection Report	Create new sling inspection report per attached sample. Report is project based (similar to crane inspection report). Cover page is a title page for the report. Create three versions of Report: - Detailed Report (all tasks), - Issues Only Report (S11[B] or S11[C] = 'Yes') - Found Items Report (S11[D] = 'No').	Create version of Crane Inspection screen that will generate reports for sling inspections.; Change report layout to match sample, upload new version for testing; Create new GetUDFAns4 program to get Project UDF answers. Change logic to generate both Project and Asset UDF answer cursors;
22573	Enhancement	Asset Tracking Asset Information	Add two new fields to Asset Information (rtasset) - In Service (y/n) - Last Inspection (date) Change AFI Upload to fill out last inspection date with compbydate from rtask.	Add fields to table, and rtasset screen.; Change ProcessAlert to update insdate field when COMPTASK event is processed.;
22576	Enhancement	Invoicing/Shipping Comparative Sales (Invoiced) Report	Change standard form to abis form.	Change default invcomare form to ABIS version of form.
22591	Enhancement	Item Control (Inventory) BOM Screen	Input note is carried over from old item when adding new item	Change logic to clear line item note on add of new item.; Item note update logic would not let item note be removed (ignored if note was blank), change logic to allow save of blank note.;
22577	Enhancement	Order Entry INVROLLUP on SO and RFQ	Add INVROLLUP logic to PrintSO and PrintRFQ. Add to pdfmaker. Add to ChangeOrder to calc Original Material Price.	Add logic to PrintRFQ and PrintSO screens. Add to PDF Maker PrintRFQ and PrintSO also; Change ChangeOrder OrigAmt logic to get total of items that are not flagged with NOCOMMISSION or are flagged with INVROLLUP;
22584	Enhancement	Production PWO Assembly	Require SO Header lock before allowing assembly of PWO lines. (prevent overwrite of assembly costs).	Add logic to require SO Header lock before assembly or disassembly of PWO lines.;
22592	Enhancement	Purchase Orders PO Receipt Screen	Change Backorder report to show items linked to PWO's better. Current logic assumes lines linked to SO line, and qty shown is SO line qty.	Split Linked logic into two parts, one when po item = so item, other when po item <> so item. Use SO open qty for SO link, SOXPO qty for PWO Link;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22560	Enhancement	Roll Former Integration FTP AMS files	Add functionality to FTP the Eclipse files back and forth.	Start work on changes to allow FTP of AMS files from local AMS directories to remote FTP folders; Change logic to handle non standard FTP ports. Change to use different FTP class (old class did not handle 2205 port correctly); Install new version of ADJAMS process. Add new fields to AMS rule to allow FTP access Open port 2205 on Rackspace Firewall. Test transfer of COILIN and PRODOUT files to/from remote server. Files appear to be transferring correctly (using STRATFORD folder on remote server);
22585	Enhancement	Roll Former Integration AMS OrderIn Logic	Current logic looks for PIECE MARK in SOC question to find Piece Mark (user1 in orderin.del), change to look for RCODE = "A"	Change to look for Rcode = "A" instead of question containing "PIECE MARK" when sending SOC Piece Mark Data to AMS (user1);
