ECR #	Type	Module/Program	Requested Change:	Change Summary:
22640	Enhancement	Configurator FtIn Input in MM	Add logic to allow entry of MM number in FT field, and auto convert to Fractional Ft and Inches.	Add logic to allow entry of MM number in ft box, and convert to Ft / IN Example, enter 5000mm in field, converts to 16 ft, 4 7/8 inches. Make field larger to allow entry of 5 digits + mm flag.;
22481	Minor Bug	Diamond Tools SQL Query tool	Query save logic generates an error if separate logging is enabled, and you switch to log database and run queries (it tries to save the query into the log database).	Change to use global connection to save query back to query table. Local connection is connected to different database if querying separate log file.;
22610	UI / Usability	General Ledger Financial Report Writer	Tool tip is wrong on Fwd/Back buttons.	Correct tool tip (Next Report, Prev Report)
22639	Enhancement	Invoicing/Shipping Billed CommCode (PinvGroup)	Add Customer Category to cursor.	Add CustCat from Shipto if filled out, else billto.;
22633	UI / Usability	Item Control (Inventory) Item Transfer	Check/Add OHF record for Target item as first step of Target update logic (current logic has it after the avgcost update).	Change logic to check/Add OHF record before avgcost update.;
22636	Enhancement	Roll Former Integration AMS process	Run all user fields thru double quote program to remove double quotes and replace with two single quotes.	Add code to swap double quotes to single quotes in all user fields, description fields, and customer name, address fields.
22642	UI / Usability	Sales Tax Automation Sales Tax Due Report	Correct issue with master cursor (has duplicates in it)	Change master query to remove duplicate records. Change tool tip on Output button.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22638	Enhancement	Task Management Task Status report	Add billing notes to cursor.	Add billing notes as bnotes to cursor.;
