

Version 1311.1164

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22548	Enhancement	Purchase Orders Purchase Order - Configurable Items	<p>Add configuration screen and logic to PO Line Item entry.</p> <p>Change GenPO screen to convert qtyord to sotran.qtyord*sotran.fqty when item is configurable and has a controlling qty question. Set purchase unit equal to pricing unit.</p> <p>Add SOC fields to PrintPO. Add ability to exclude SOC questions/answers from PO form.</p> <p>Change to make costing work like pricing on SO screen moved to different ECR</p>	<p>Copy SOC config into POC config when generating POs from SO screen.; Change PrintPO to have POPDESC and POPDESC2, CUSTBINCH and TUNIT fields.</p> <p>Fill out needed cursor to allow getSOC() function to work from PO Report forms; Add Cost Purchase Unit and Purchase Unit Cost to POQUEST new screen. Use values to fill out PO; Change layout of POquest screen to lock units on config items. Transfer costadj values into potransans. Change SO screen to save costadj values into sotranans. Change PO screen to lock units if item is soc item. Change calcunitcost to use new fqty field if filled out (transferred from SO screen); ; Work on receipt logic for config items. Make changes to itemact records to record correct costs.;</p>
22792	Enhancement	Logistics (Shipping Events) SE Transfers - In Transit Warehouse	<p>Add setup option, SETTRANSIT, to enable the following logic for Shipping Event Transfers:</p> <ul style="list-style-type: none"> - Upon shipment of carton(s), move inventory to "IN_TRANSIT" warehouse and "IN_TRANSIT" bin. <ul style="list-style-type: none"> -- On Hand Qty in source warehouse is removed. -- Allocated Qty in source warehouse is removed. -- On Hand Qty in IN_TRANSIT is added. -- Allocated Qty in IN_TRANSIT warehouse is added. -- Location of shipped carton(s) changes to IN_TRANSIT warehouse. - Upon unload of carton, move inventory from IN_TRANSIT warehouse. <ul style="list-style-type: none"> -- On Hand Qty in IN_TRANSIT is removed. -- Allocated Qty in IN_TRANSIT warehouse is removed. -- On Hand Qty in Target warehouse is added. -- On Order Qty in Target warehouse is removed. 	<p>Add setup option SETTRANSIT, if found, transfer items from intercompany SE's to IN-TRANSIT whse when carton is shipped.; . When unloading carton, move from IN-TRANSIT whse instead of source whse if option is enabled.; Change UnloadCart to use original cost tier if possible. This will make the inventory flow thru the IN-Transit whse at the same cost.</p> <p>Change SEADD2 to unlock UnLoad button if SENOUNLOAD is enabled and SETTRANSIT is enabled and SE is intercompany</p> <p>Change allocated logic to show items allocated from IN-Trans whse once they are shipped;</p>
22799	Enhancement	Route Screen	Check for blank route name, and do not allow save	Current logic checks for empty name, and does not allow save
22863	Enhancement	Shipping Event Viewer - Check	Add new button (Check Line Status) next to Chk Status button.	Add new Check Line status button. If clicked work thur SEs, calculate the number of Non FRT lines that can

Adjutant Desktop Release Notes
Version 1311.1164

ECR #	Type	Module/Program	Requested Change:	Change Summary:
		Status	Add new column (SO Lines Ready) to show number of lines that are available to ship vs. not ready (if 9 lines and 6 are ready, then show 6 of 9). Exclude freight and packing line items. Populate new column when new button is clicked.	ship right now, show as xx of yy in new column;
22868	Minor Bug	Quote Screen - GM% column	Quote Screen - GM% column GM% column is zero on all line items...column not filled out.	Work on getting GM% to show after quote is loaded.;
22869	Enhancement	Project screen and default customer	Change default customer logic to be by AttrType (Default SoldTo, Default ShipTo etc.) Improve UI around AttrType field (tends to blank out often)	Change logic to allow a Default for each type of customer (SOLDTO, SHIPTO etc) Clean up edit logic. Change MakeSO logic to use default for each type if found (SOLDTO, SHIPTO etc..) Change Project Labels to use default for each type if found. ;
22872	Enhancement	Order Entry EDI PO Processing	Add change that fills out SO priority based on order type rule when generating EDI Sales Orders	Add logic to set SOMAST.priority in generated sales orders based on Text10 of SOTYPE rule.;
22877	Minor Bug	System Manager Request Lic Update Screen	Version string passed is too long if running from foxpro or unknow loader (the Foxpro Runtime info is passed instead of the adjutant build info) Change License webserver to limit size of version string before insert.	Make Version field larger in LICLOG table to handle Foxpro Version string.;
22885	Enhancement	UpdateCP Process	Change SOCUPDATE to update priceadj, costadj, or both depending on what is mapped.	change logic to update priceadj, costadj or both based on which is mapped when SOCUPDATE is Y;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22886	Enhancement	SQL Tool	Add check for missing where clause, warn if not found Clean up layout	Add check for where clause on update or delete. Clean up layout.;
22887	Enhancement	Email Integration Message Control	Add setup option to supress 501 errors when sending email from message control.	Add setup option (NO501) that will suppress the 501 errors when sending mail from message control;
22890	Enhancement	Wireless Terminals	Proof of Concept to drive function from rule based set of prompts. Current logic is small functions for each set, so there is a lot of code duplication, and it can be difficult to change the order of the steps	Create test screen running prompts from list of rules. Logic appears to work, will use in next terminal project. PROREC has data (*73 for demo);
22893	Minor Bug	Warehouse Managment System Prompt 45 Inventory Issue	Inventory not taken out if item is lot controlled.	Correct issues with Prompt 45 logic if using a serial/lot controlled item.;
22896	Enhancement	AP invoice CC payment	Block paying with CC on edit of invoice Update paid and balance after save a of new invoice	Change logic to now allow change to PP to C once invoice has been saved.;
22901	Enhancement	FW: auto apply pos	Auto-Apply CC credits for Sales Orders CC transactions are reversed.	Cash receipt records are flipped when auto applying SO CC Credit to generated invoice. Change logic to flip sign on records.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22902	Enhancement	Diamond Query Screen	Add option to export as CSV	Add checkbox option to force export to CSV format. This will allow export of >65000 rows with easy XLS open;
22903	Minor Bug	Warehouse Managment System Prompt 45	Prompt 45 not taking qty from correct P number bag if multiple bags with same lot number.	Change logic to directly update qty on itemtrack record. Add logic to check for use of more than on P record, warn and move back to qty prompt if case is true.;
22904	Minor Bug	Order Entry SO Screen	Ft Len Field is added to wrong record during order entry (New Lines)	Change logic to update LFTIN during line save. Old logic was updating before save, which was on the previous lines record.;
22907	Enhancement	AMS Process	Change order items are sent to ams in orderin.del file to Bundle Number (ascending) + Length (Descending) For non PWOSETBUNDLE setups, Bundle Number is always 1	Change AMS process to sort OrderIN.del file by Bundle Number (ascending) then Length (descending). Bundle Number is 1 if PWOSETBUNDLE is not enabled;
22910	Enhancement	PWO screen	Add setup option to uncheck the verify partial allocation checkbox on the line items tab.	Add new setup option (PWONOCKPARTIAL) that unchecks the Warn on Partial Allocation checkbox by default.;
22911	Enhancement	PWO - No disassemble if shipped check	Move logic outside the check for stock on hand check. Current location will allow disassemble if non stock and shipped.	Change logic to check for shipped status for both stock and non stock items.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22925	Enhancement	Inbox Readers	Change Inbox Readers to also make a ExtLog with AdjInboxXXX where XXX is CID. This can used on systems running multiple inbox readers to allow the service restart program to track them (since there is more than one)	Change inbox reader to make new ADJINBOXxxx log record, where xxx is master CID. Install at MLT in all six running inbox readers. Add records to servicelist for each one to allow Service Checker to monitor each one and restart as needed.;
22927	Enhancement	Rebuild Index Tool	Adjust Rebuild Index Tool to handle slow running rebuilds better. Add AutoProcess at Night option to run rebuilds between 9pm and 5am without user Add more status to screen, add usertrace logging	Add new auto process mode that will run in loop between 9pm and 5am. Add logging to user trace. Add more status fields to show current processes. Change to process by Frag % order.; Make standalone version (SVRINDEX.exe)
22941	Enhancement	Lic Update Request	Add record to usertrace	Add UserTrace record on LicUpdate Request;
22943	Enhancement	Sales Order Update Tool - Weight	Add "Weight" column to SO Update Tool. Allow user to change weight of line items. Update sotran.unitw2. Also update sotranans if item has SOC question with rcode = 'W'.	Add UnitW2 column to grid. Allow user to update. Update answer of "W" question if item has "W" Rcode question.
22944	Enhancement	Cartons	Add AMS bundlecode search to cartlog and printcart.	Change cartLog logic to try as cartoniD if entered carton begins with C, otherwise try as ams bundle code, update field with found carton if matched. PrintCart already has bundle serach using B prefix (if

ECR #	Type	Module/Program	Requested Change:	Change Summary:
				AMS bundle is PC500a, then use BPC500a as entered value)
22945	Enhancement	Post-Load Report	Add carton ID and AMS bundle code to cursor of sepost2.	Add cartid and bundlecode2 to cursor.
22946	Enhancement	Project Screen	Entering the Shipto company name with NEWLOOKUP enabled, does not fill out the shipto custno when selected.	Change logic to update ShipNo when ShipTo is entered and NEWLOOPUP is enabled.
22947	Enhancement	Task Management Add Status Tab infor to Task Status Report	Add current status info and remarks to cursor for the TASK STATUS report. User would like to see the current status and all text in remarks on the task status report.	Add tstatus,statusremarks,tsdate to cursor, fill out with current status info (tsdate is char field)
22948	Enhancement	Open Task History from Task Screen (?)	Change popup screen to reset grid to first record before display	Set grid to first row when displaying open task history (?t butons) ;
22950	Enhancement	Convert RFQ	ConvertRFQ process does not extend tax amount on SO line correctly (does not round to 2 places when done)	Round ExtTax to 2 places when converting RFQ Line Items.;
22952	Enhancement	Flat Rate SO from ECR screen will not ship	Flat Rate SO from ECR screen will not ship	Change FlatRate SO generation to set unitfact = 1 Change manualship to set unitfact to 1 if unitfact = 0;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
22954	Enhancement	Accounting Connector Convert RFQ Total Amt	ConvertRFQ process does not extend total amount on SO line correctly (does not round to 2 places when done)	Change logic to round extstot to 2 places when building sum of order for SO header ordamt field.;

Total Number of Changes: 33
