ECR #	Type	Module/Program	Requested Change:	Change Summary:
22938	Enhancement	AMS Bundling	Bundling Changes: 1) Make all sorts have Length descending in them, so the items are always sorted by longest first in each bundle. 2) Insert first picecmark into User1 field of each bundle	Change bundle screen to sort by length descending after major sort.; Insert Piecemark into user1 of amsbundle record if PWOSETBUNDLE is enabled.
23004	Enhancement	Auto Logout on Duplicate Login	Change logic to hold logout attempt until modal windows are not being displayed.	Change logic to not auto-logout if print preview is being displayed (wait in 5 second blocks until the preview is not displayed anymore).
23000	Enhancement	MBS quote import - update	Change MBSQUote to update existing ProjOpp if found.	Add logic to allow update of ProjOpp if matching MBSID is found in ProjOpp Table.
22871	Enhancement	PWO Date: Required vs Load Date	Add setup option to make PWO Due = SO Req Date when creating PWOs.	Add setup option PWODDREQ that will use Header ReqDate as the source for the PWO duedate calculations (system will still use existing rule setup, but will use ReqDate as the base not Load Date).
23003	Enhancement	Se Viewer Report	Add color code to bottom of screen.	Add small color code to bottom of screen to indicate the color meanings.
22998	Enhancement	Shipment Forecast Report	Modify Shipment Forecast Report to use SE Pickup Date as date range. If Pickup Date is null on a SE, then revert back to SE Load Date.	Add setup option (SEPUDATE), if set then use PickupDate as controlling date for report if filled out, else fall back to shipdate (loaddate).

ECR #	Type	Module/Program	Requested Change:	Change Summary:
		(shipforecast)		
22947	Enhancement	Task Management Task Status Report	Add current status info and remarks to cursor for the TASK STATUS report. User would like to see the current status and all text in remarks on the task status report.	Add tstatus,statusremarks,tsdate to cursor, fill out with current status info (tsdate is char field) Add allstatus field, has status remarks from all status updates, order by adddate descending (newest first in list).
23002	Enhancement	TaxCalc	Change taxcalc logic to handle lines with qtyord = 0.	Change taxcalc logic to handle qtyord = 0 (Qtyord is used to find unitprice from extprice), qtyord = 0 was generating division by zero issues.
23006	Enhancement	Accounts Payable VoucherList/AP Master	Change AP Invoice Master screen to open the same size as the Voucher screen if the voucher screen is moved to the right side of the screen. If voucher screen is sized to fill up right side of screen, AP invoice screen will open with the same size on the left side of the screen.	If VoucherList screen is moved to right side of screen, open AP Master screen in left side of the screen at the same size (top, height and width).
