

Adjutant Desktop Release Notes
Version 1312.1175

| ECR # | Type | Module/Program | Requested Change: | Change Summary: |
|-------|-------------|--|---|---|
| 22883 | Enhancement | Invoicing/Shipping Non Stock Report Logic | Add logic to the non stock report to work through the soxpo records to try to match up the unshipped qty to open SO lines (so the report can handle more than one link on PO) | Add new logic to SO matching to look for open unshipped lines when filling out Docno field. |
| 22982 | Enhancement | Time and Materials Bill Cycle/Summary Tax Reporting | Add 4 tax fields to the cursor for the Bill Cycle Bill Summary Report Tax is currently not broken out by product group for tasks/service orders. User needs to be able to report on total tax, and total taxable amount per work category per product group. | Add new fields for tax by product group (LTax, EqTax, ExTax, MTax, STax) |
| 22987 | Enhancement | Sales Order Update Tool - Edit SOC list type quest | -Fix the column for "Section" (SOC rcode Q) in the grid (not filled out with the answer on the line item). -Add functionality to enable editing of list type SOC questions (Color, Section, Leading Punch, Trailing Punch, etc). | Rule setup incorrect for Section type questions. Change grid to allow edit of SOC list type questions. Pricing is not changed, just the answers. |
| 23014 | Enhancement | Address Book Air Hammer | Character Limit change on Organization Air Hammer grid column: Change character limit in PO column on grid to 20 characters (this will prevent PO numbers from getting cut off and breaking drilldown logic) | Change PO fields to 30 chars. Verify loading of Long PO # via double click |
| 23015 | Minor Bug | Roll Former Integration MBS Grid | NewItemLookup showing inactive items. | Change parameters in NewItemLookup call to suppress inactive items. |
| 23018 | Enhancement | Invoicing/Shipping Invoice Printing | Add checkbox to PRINTINV which will tell system not to print \$0 invoices. Also add setup option which will auto check this box by default (so when AUTOMAIN is running, \$0 invoices will not print). | Add new Skip Zero Dollar invoice checkbox. Skip printing zero dollar invoices if checked, mark as printed only. Add setup option (PRINTINVSKIPZERO) to default the checkbox as checked. Build new version of AutoMain to use same logic during auto processing. |

| ECR # | Type | Module/Program | Requested Change: | Change Summary: |
|-------|-------------|-------------------------------------|--|---|
| 23020 | Enhancement | Update ABC Codes | Look at code update logic, does not appear to be working correctly if Process by Whse is selected. | Change logic to handle Run By Whse cases better with all usage groupings. |
| 23021 | Enhancement | Coil Finder/Item Master | Add option to skip WIP lookup | Add setup option to skip WIP lookup during processing of grid (SKIPCALCWIP). |
| 23026 | Enhancement | Accounting Connector Autoreports | Add an option to Autoreports (autoschview) to allow a delete and rebuild of future schedule. | Add new CTRL-Right Click option to regenerate single event (delete and add back) Add new Right click of lower date field to regenerate all events for that date (delete and add back, using original time for each event). |

Total Number of Changes: 9
