22991	Enhancement	AFI Tablet	<p>Add text file based logging to all processes to help with troubleshooting speed and other issues.</p> <p>Allow logging at two levels (everything and errors only), add option to change to Settings.</p> <p>Add option to upload logs to setting screen</p>	<p>Add logci to allow logging to text file using nLog.; Continue adding logging. Add option to switch logging level from settings screen. Add option to upload log file;</p>
23044	Enhancement	AP Check Register reports	<p>Report total is resetting on ChkAcct, not report on all standard reports.</p>	<p>Change reports to make final total = report total, not last checking account total;</p>

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23039	Enhancement	System Manager CID Delete	Add logic to use AdjDBTable to delete orphans from all tables with IKEY, CUSTID, VENDID , SOKEYNOH , POKEYNOH. Match back to correct parent table (Item Master, Ent, SOMAST, POMAST)	Add logic to orphan delete logic of CID delete screen to loop thru all tables with ikey, custid, vendid, pokeynoh and sokeynoh fields, and delete rows if value is non-zero and not in the matching master file (ITEMMASER, ENT , POMAST or SOMAST);
23025	Enhancement	Expedite Control (exp1)	Screen tries to use table that does not exist anymore (vcust), change to use ent instead.	Marked as Not In Use, disabled all input fields.;
23049	Enhancement	Expedite Orders - PO Type filter	Add PO Type filter to Expediting screen.  [cid:image001.png@01CF0C94.F31E5C20]	Add new PO Type filter to Expediting Screen
23012	Enhancement	Item Control (Inventory) Min/Max update screen	Add additional attribute (Import/ Long lead Products) to only run updates on the check box selected (not an exclude like the existing attribute)  Add warehouse drop down to allow only one warehouses ohf records to be updated at a time.  If the exclude and 'only include' check boxes are not checked add a confirm pop up box that all items are to be updated, when Process is selected.  Check box to export only, dumped excel file with existing and new values for selected update.  Attached picture for update screen.	Add new whse dropdown, if whse selected, only process this whse. Add new export only option, do not update if selected. Dump out update file as MINMAXTABLE.(xls/csv based on row count) Add new Include checkbox to just process items with new AUUPDATE item attribute;
23038	Minor Bug	Address Book Org Air Hammer	PO lines are duplicated on detailed PO tab in some cases (duplicate PO number in different CID)	Change detail PO query to handle cases where same PO number exists in other CID;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23045	Enhancement	PO Receipt Lot Generate Logic	Add setup option to make generated lot = PO#-Proj#-Phase for non-coil lot controlled items.	Add new setup POLOTPROJPHASE, if option is enabled, and item has PONOISLOTNO attribute, use PO-PROJ#-PHASE as lotnumber.;
23041	Enhancement	PO Receipt of Config Items	PO receipt of config Items updates PO with invalid extcost  Attempting to AP invoice same PO Config items has incorrect extended cost.	Change PO Receipt screen to update POtran.extcost correctly for configurable type items. Change AP invoice master to extend cost of PO receipt lines correctly for PO config type items. Change PO receipt history tab on PO screen to show correct cost for PO Config type items.;
23037	Enhancement	Accounting Connector PWO Allocation - Coil Rec Date	Add field to PWO screen on Allocate and Allocate to Ser/Lot tabs receipt date (add date) of the coil/reel (user will be able to see which lot is the oldest and use it to help move older inventory)	Add/Verify CreateDate column in dropdowns when searching for lots on Assign Serial/Lot tab. CreateDate is adddate from itemtrack record, which is the date the Lot/Serial record was created in system.;
22999	Enhancement	Quick Buy	Remove OverMax change from ECR 22482	Remove logic to subtract one order inc qty from RecReORd if RecReOrder is over Max
23034	Enhancement	Receipt History Tab, Inventory Account	Inventory account logic getting wrong account on returns, change logic to handle returns correctly	Change to use cflag in GLDIST to find inventory and po clearing account (C = inventory, P = PO Clearing), fall back to old logic if flags not found.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23027	Enhancement	Accounting Connector Sales Order	Add setup option which will disallow user from changing cost on a line which has been shipped.	Add new setup option LOCKCOSTONSHIP, if enabled, cost cannot be changed from screen, or via BOM change once line has been shipped (qtyshp<>0)
23048	Enhancement	Accounting Connector Shipping Event Viewer - Check Status	Add new column (SO Lines Shipped) to Check Line Status on Shipping Event Viewer (sereport.scx) to show number of lines that have shipped vs. not ready (if 9 lines and 6 have shipped, then show 6 of 9). Exclude freight and packing line items. Populate new column when new button is clicked.	Add new column to results grid. Showing number of lines fully shipped vs total lines. Filled out when Line status button is clicked.
23024	Enhancement	Terminal Control - Server	TermControl Server Version does not use new security if enabled. Change to use if enabled.	Change TermControl-Server to set NewUserSec flag if option is enabled (Vterm and TermControl already set flag);
