ECR #	Type	Module/Program	Requested Change:	Change Summary:
23129	Enhancement	AR Aging - Report Set, Invoice Status Filter	Invoice Status Filter not used at times depending on the default setting (Combo not updated after RS Setting Load)	Ar aging does not use saved ReportSet Invoice Status Filter if default Invoice status is All. Change logic to use loaded status (update filter on RS data load);
23130	Enhancement	Adjutant Error	Issue with BillByProject report Error: Message Unknown member CBOEXT3.	Correct issue with CBOEXT3;
23108	Enhancement	BOM Import	Change screen to use ccurrent = 'y' if blank, and custom = 'n' if blank	Add code to set ccurrent = 'y' and custom = 'n' of blank or not mapped.;
23128	Enhancement	CertPWO logic	Itemact.Shipperno not filled out correctly in CertPWO processing (should have keyno of first itemact record in current assembly batch), has NULL at times. Used by Prompt 45 and prompt 46 during assembly.	Change logic in CertPWO to fill out itemact.shipperno correctly. Used by PWO Detailed assembly report to break assemblies into groups based on when they were processed. CertPWO is used by wireless programs to assemble PWOs;
23104	Enhancement	Cycle Count Screen	Change logic on Active screen to allow selection of any line, but do not allow commit of non-flat serial lines where diff>1	Remove restriction on selecting serial counts where change>1

ECR #	Type	Module/Program	Requested Change:	Change Summary:
			(check is currently done when selecting line)	Verify update will not update non-flat serial where change is >1
23119	Enhancement	District Manager Report	Add sort option to District Manager Report from greatest to lowest using the Total column "month1+month2+month3+month4+month5+month6+month7+month8+month9+month10+month11+month12" Also add all active DMs that are not on the report with 0 dollar lines	Add option to sort by total descending. Add all active SP's that are not on report with zero dollar lines. ;
23136	Enhancement	Email Setup	Add new SMTP Auth option, allow selection of alternate SMTP auth methods.	Add new SMTP Auth option on User screen and CID screen. Change email programs to use vaule if entered.;
23106	Enhancement	Mod Processor	MI records have 00:00:00 as adddate time part, change to 00:02:00	Change Mod Processor to use 2 minutes after midnight as time part of itemact.adddate value to match other itemact data.;
23111	Enhancement	Org Air Hammer	Pressing esc while in the Value column on the quote grid will generate an	Comment out old code , pressing esc no longer generates error.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
			error.	
23131	Enhancement	Purchase Orders PO Screen	When PO updates SO cost, order GM is not updated on SO (sotran.extcost is not updated)	Update sotran.extcost when updating sotran.cost from PO screen for linked PO lines;
23116	Enhancement	Project - PWO Tab	PWO# column formatted as date In Detail mode.	Remote date format from PWO# column on Production tabs
23093	Enhancement	Prompt 46	Change final step to warn if user enters zero as qty to assign to lines. Change user trace log descriptions to be clearer.	Change 46 user trace descriptions to make clearer which are qty to make and qty to use. Change Qty2Make prompt in terminal to make it clearer than qty that is being entered.;
23121	Enhancement	Order Entry SO Screen	Clicking the Line Item View tab when not in EDIT mode prompts this message. Please fix so that it doesn't pop up when in save mode.	Change Line Item View tab to not check header if not in edit mode.;
23107	Enhancement	Accounting Connector Standard Task	Add option to Standard Task which allows user to mark standard tasks with an option which will REQUIRE that a meter and meter read be entered in time/material entry screen	Add two options to standard task (Meter Read Req'd and Meter Serial Req'd) Change task complete logic to check flags. If Meter Read Req'd, task must have READ record for Asset. if Meter Serial req'd, timesheet must have item with ISMETER attribute with serial filled out.
23113	Enhancement	Address Book Suspect Attribute	Add a setup option that auto-assigns the suspect attribute and launches the suspect screen after the save of a newly created Organization,.	Add new CID setup option (ADDSUSPECT), if enabled, suspect screen is launched after save of new Org, adding suspect attribute to new Org. NOTE: Orgs created from other screens will not auto populate a suspect attribute.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23103	Enhancement	Accounting Connector Suspect Updater	Add fields to importer- two fields for each item, a value and a blank flag since it will not map the field if blank (need updater to ONLY update fields which are mapped, OR, only update fields which <> blank on the importer file). This will ensure that existing suspect data will not get overridden with blanks.	Change Suspect Importer to use flags on update processing to only map and use columns that are marked as updxxx = 'y'
23135	Enhancement	Logistics (Shipping Events) Unload Carton	Unloading a carton from another carton does not update the higher level carton's weight.	Add new function to recalc Unloaded Carton's new Wt, and then recalc all the cartons up the chain to the outer carton.;
23137	Enhancement	Logistics (Shipping Events) Unload Carton	If SETransit is enabled, items are not cleared out of allocated status in original whse during carton unload. (Items are not actually in original whse anymore, so UpdateOHF does not process the origingal whse.)	Change processing to process original whse also when unloading cartons with SETRANSIT enabled.;
23115	Enhancement	Update Unit Factor Screen	Add new options on Update Unit Screen to allow update of UnitFact on PO, SO, RFQ and PO Bids. Factor is used to calc on order/ allocated numbers.	Add new options to Update UnitFactor screen to allow update of unitfact on SO, PO, RFQ and Bid PO lines.;
