23624	Enhancement	Quoting Add Proj to RFQ Cursor	Add msn.msnnum and msn.name to the quote form (variables: msnnum and msnname in a_pomast)	Add msnnum and msnname to a_pomast cursor in PrintRFQ and PrintSo Add phasename to main cursor in PrintRFQ (already in printso) Make same changes in PDF Maker.
23616	Enhancement	Questware Integration Add setup options for AMS users 2/5	Add setup options for AMS user2 and user5 fields so that these fields can point to different data in Adjutant based on the client setup.	Add setup options AMSUSER5CUSTNO and AMSUSER2PROFILE to change values in orderin.del file; Change to use profile profile instead of ams profile. Upload new version.;
23573	Enhancement	Warehouse Managment System Add truck location as part of prompt 79	Add an additional question during Prompt 79 on the wireless terminal program that will ask for Truck Location. Add this stored information to the cursor for the Post Load report.	add prompt after scan outer carton to ask for carton location (enable with 79LOCATION); Change Post Load report to have location = current carton/P number location.;
23601	Enhancement	System-Wide / UI Air Hammer - PO Tab	On the Air Hammer - Purchase Order tab, add columns for required date and estimate dates.	Add pomast.estdate, pomast.reqdate to summary PO tab, add potran.estdate, potran.reqdate to detail tab.
23599	Enhancement	System-Wide / UI Air Hammer - Sales Order Tab	On the Air Hammer Sales Order tab, add Required Date and Load Date columns.	Add somast.est and reqdate to summary tab. Add sotran.estd and reqdate to details tab
23623	Enhancement	Order Entry Audit SO Line	Add quick keyboard shortcut to get the audit log on a SO line item (right-click on the L# label)	Add right click to L# prompt to show quick audit of SO Line;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23435	Enhancement	Report Sets AutoProcess	Add new logic to track report set starts, and skip report if started more than twice. Log skip in autolog	Auto process changed to only attempt report set twice, if fail after that, marked as processed and logged.
23605	Enhancement	System Manager BarCode printing	Change label engines to handle paper size issues better.	Change label engines to handle paper size issues better (break lines into smaller segments)
23587	Enhancement	Logistics (Shipping Events) Carton Label ShipVia	Add somast.shipvia to carton label	Add shipvia to c_bundle2 label. Move fields around to prevent overlaps
23439	Enhancement	Task Management Changes to Reinspects, show details, add filter	Change Reinspects to show as Reinspect on Tap Journal. Also show details of inspects instead of single Quote line. Add filter to include/exclude/show only Reinspects on tap journal	Add new reinspect cost block to district tab setup. Change reinspect logic to use rates to build detailed records for reinspects.
23512	Enhancement	Roll Former Integration Connex Logic Change	Use Job.User2 as SO# and Job.Job as first 16 chars of SO Soldto Name Change SmartLoadCoil logic to use Job.User2 to get SO number. Enable with setup option.	Add new setup option to send different file to Connex with job = customer name (16 chars) and User2 = SO # Change Production format template to use have Job.User2 as JOB number to allow matching back to SO during assembly
23618	Minor Bug	Address Book Contact Quick Search	Change quick search from toolbar to exclude contacts where inuse = n	Change quick search from toolbar to exclude contacts where inuse = 'n'

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23627	Minor Bug	Project Management Create RFQ from MSN screen	When creating a Quote off of the project screen use the project shipto location for the default shipto on the quote. Similar to how the shipto works off of the create SO button	Change logic to use project shipto when creating RFQ from Project Screen.
23613	Enhancement	Address Book Credit Jump Screen	Add the CREDSUMMARY jump screen from the existing credit hold process to the BillTo attribute. The request is that this screen is available for all customers, not just those that are on credit hold. Preferably use the RMB on the BillTo attribute to launch CREDSUMMARY screen or add button within the BillTo jump screen to access CREDSUMMARY.	Add new credit summary as jump sceen from Ph prompt next to billto on SO screen.; Add aging from CredSummary to bottom of Billto Screen. Aged from duedate, includes credit, excludes deposits, shows all invoice types.;
23574	Enhancement	Custom Reports Custom Tax Report	Create custom report to display tax exemptions by county record. Need to record in the report the county tax that should have been collected from shipments for tax exempt lines.	Create new NonTaxable report to that shows all nontaxable sales sorted by state/county within date range.;
23615	Enhancement	Production Delete PWO from AMS	Be able to delete the PWO by sending down delete commands for all existing AMS lines on that PWO, removing them from AMS when the PWO is deleted on the PWO side.	Add logic to send Deletes to AMS if PWO is deleted from AMS and AMS and PWOSETBUNDLE is enabled. Send deletes also if PWODELAMS is enabled in non PWOSETBUNDLE system
23619	Enhancement	System-Wide / UI Greenfax Single Email	Adjust the Greenfax processing logic so that it will use a single email address (stored in a rule setting) for all sent faxes. Change system to also handle FAXAGE service using same logic.	Add new rule FAXFROMADDR (text1 = email address, text2 = name). If filled out, email based fax processes will use this email address as the from address.; Expand greenfax code to handle faxage email faxing in same method. FaxUser is not needed, faxage does not use code in subject.
23590	Enhancement	Item Control (Inventory) Inventory Air Hammer	The SO and PO tabs of the item air hammer needs to display country of origin in its search preview screen.	Change ItemAir Hammer to use NewItemLookup if enabled. New ItemLookup as COO in grid.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23588	Enhancement	Logistics (Shipping Events) Inventory Label	Create custom inventory label with Custname and Load date from linked order, also add TOTAL WEIGHT (this is finished good label printed from Prompt 46)	Create new custom g_inv4x2 label (used from 46 only right now). Label has customer name, total line weight, so load date.; External prg, g_inv4x2wXXXX.fxp where xxxx is cid
23632	Enhancement	Report Sets Nite Inv	Add program to Adjutant to run niteinv at any time. Run data to new table, niteinv2, so that it does not conflict with niteinv data.	Create new screen to run niteinv to new table (niteinv2);
23579	Enhancement	Production PWO Screen	Ensure Posting Window is checked in all cases.	Add/Verify Posting window is checked for all assigmennts and assemblies.;
23604	Enhancement	Project Management Project Contacts - Preferred Phone	Change order of preferred phone numbers to be in vcontact.sphone1/2/3/4 order instead of cphone.keyno order.	Change logic to phone numbers in same order as contact screen.
23620	Enhancement	Warehouse Managment System Prompt79	Update that ECR 23573 was intended to create additional question in Prompt 79 after each C/L/B/P scan to ask where in the truck the C/L/B/P was loaded. The loader would then key in a few characters to represent the location (*see examples below) and hit Enter to accept the location. Enter will return the user to scan the next C/L/B/P and the process will continue with C/L/B/P, truck location, C/L/B/P, truck location, etc. until they mark the truck fully loaded. Add this stored Truck Location information to the cursor for the Post Load report. *Some examples of locations keyed in are: RF (rear floor) or BT (bottom tank) or RRW (right rear wall) etc.	Adjust Prompt 79 to ask for location after C/B/P?L scan. Enabled with 79LOCATION setup option; Add new log4 to carton type rule (LocPrompt), if enabled, will be prompted for location when packing into.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23629	Enhancement	Procurement QB Column Add	Add a setup option to add in a column for OH for all whses and a set of usages for all whses in the Quick Buy Screen	Add new OnHandALL and Usage1-5 All columns. Enable with QBSHOWALL option;
