ECR #	Type	Module/Program	Requested Change:	Change Summary:
23645	Enhancement	Item Control (Inventory) Slow Stock to Report	Change the Slow Stock (called Slow Stock) Diamond Query and change into custom report	Work on new report to show slow stock (using base logic from diamond); Add logic to save/settings based on cid/user;
23663	Enhancement	Task Management Approve Edit	Update rttask.price after the apredit reprice, or grid edit (in most cases, the reprice all and the grid edit do not update rttask.price, which is what is used as the current task billing total)	Add logic to update rttask.price when saving grid edit. This will handle grid edits, and reprice button
23716	Enhancement	Email Integration Auto Processing	Add new SOAUTO- and ASAUTO- attributes to allow different defaults for different processes. Add SOAUTO and ASAUTO CID setup options to enable. ASAUTO will make AR Statement auto processing uses ASAUTO- attributes SOAUTO will make SO Printing default to SOAUTO-attribute	Add new setup options (SOAUTO and ASAUTO), to control if SO and AR Statements use special AUTO-attributes (ASAUTO-xxx and SOAUTO-xxx) ;
23713	Enhancement	Address Book Auto-Skip Attribute	Create new org attribute AUTO-SKIP that when applied to bill to account invoices will generate but the actual invoice form will not go anywhere.	Add logic to skip processing of documents during auto process logic if org has AUTO-SKIP
23614	Enhancement	Questware Integration Duplicate Sub Assemblies	Create a duplicate match up screen that will handle the sub assembly items for Questware integration. These sub assemblies will tie into the custom BOM table.	Change MBS Grid to allow link to second QW file that has BOM details for main parts. Allow matchup to adjutant part numbers and save into new AMSPWO table for use as BOM inputs during production; Build custom BOMs out of imported BOM items, and link to generated SO lines.;
23642	Enhancement	Accounts Payable GL Report Req	Add keynos to AP Dist table to group checks during check run process, pass those keynos through during batching process. (controlled through multi-screen set up options) Second change to allow report writer to see those "sub-batches" and not include them when totaling the overall batch amount.	Change check printing logic to insert keyno of first check on all apdist records as groupkey. Change TransAP batch process to move groupkey into gldist during batch generation process Change GL General Ledger report to group like keys into single record when in detail mode, and Use Group Keys is checked.;

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23668	Enhancement	Address Book Link Zone to District	Create a setup option that links the zone to the SoldTo record,and carries it through to all location records (children) associated with the District.	Add new setup option (SOLDTOZONE), change task, tapping, reinspect and wo generator screen to use soldto (district) zone as default zone for generated tasks.
23670	Enhancement	Task Management Material Checkbox	Add 'Material' column to Task Grid display that would show a check mark if material has been assigned to a service order.	Add new hasmaterial checkbox. Enable with RTGRIDMATERIAL setup option.
23691	Enhancement	Item Control (Inventory) Mod Procc. Columns	Need to add 2 columns to the bottom grid of the Mod Processor: BOL # (this is a udf field that is a text field, it is NOT an adjutant BOL#) LOAD # (this is a udf field that is entered in as text, it is NOT from Adjutant) Functionality needs to match fields like "NEW SERIAL/LOT #" Both need to be in the cursor of the Mod Processing Log	Add new columns to lower grid (xbol and xlad) 50 character, saved to MODLOG. Change to include in preview report In both preview and finished modlog as xbol and xlad
23714	Enhancement	Logistics (Shipping Events) Post Load Report	Change 'description' expression in main cursor to use Sales Order description (instead of itemmaster descrip) when record is a SO Line Item.	Change SEPOST2 to use SO description instead of itemmaster description.
23682	Enhancement	Procurement Production Change Req	Add setup option to prompt users to enter footage used on scanner after each line is completed.	Add new setup option 46single, if enabled, process each pwo scan thru process (assume + entered each time)
23687	Enhancement	Warehouse Managment System Prompt 45 & 46	Change itemact.adddate to equal itemact.tstamp on Prompt 45 and 46 transactions (time is currently set to 12:02AM).	Change Prompt 45 and Prompt 46 to use current datetime for adddate in itemact.

ECR #	Type	Module/Program	Requested Change:	Change Summary:
23711	Enhancement	Item Control (Inventory) SOC Char Length	Increase the character length for the SOC answer field through the sales order configurator jump screen to be 100 characters long.	Change SO and RFQ screens to allow 100 char answer to text type questions;
23717	Enhancement	System Manager SQL confirmation	Add extra confirmation screen any time a delete query is written regardless of whether or not there is a where clause.	Add Confirm step on all delete queries after where check in sql box;
23674	Enhancement	Task Management Task Grid Req	Add the following columns to the Task Grid display: - Labor Time (Total time entered for all resources on the task) - Equipment Time (Total time for all equipment on the task) - Total Time (Total Labor + Equipment)	Add new setup option (RTGRIDTOTAL), if enabled fill out new total labor, total eq and total labor+eq columns
23671	Enhancement	Task Management Task Resource Req	Create a setup option to prevent users from saving a service order/task if the resource is empty on the Task Entry screen.	Create setup option REQRESOURCE, if enabled do not allow the save of task without assignment to resource.;
